

A large, yellow leather welding glove is the central focus of the image. It is positioned diagonally, with the wrist area towards the bottom left and the fingers towards the top right. The glove shows signs of wear and is resting on a dark, textured surface. A welding torch with a copper-colored handle is visible on the right side, partially overlapping the glove. The background is dark and industrial, with some sparks or debris visible.

FR / Leather Welding Jacket

FR Clothing Range

- Premium split leather shoulders and arms
- Full torso 100% FR cotton denim
- Kevlar® stitching
- FR cotton standing collar
- Internal pockets and under-arm gussets
- Double bar tacking

MORE INFO HERE

Combining the best attributes of split leather and flame-resistant cotton, the ESAB FR/leather welding jacket gives fantastic protection from welding spatter in a comfortable, lighter weight jacket than a full leather option. This combination jacket includes three generous internal pockets to hold all essentials without the possibility of catching hot materials. A full-length hook-and-loop front fastening system with standing collar seals out hot material while still being quick and easy to remove.

Designed for comfort as well as protection, generous sleeves with adjustable cuffs facilitate a good fit.

Under-arm gussets also help when welding overhead, helping to ensure that the sleeve always covers the entire arm.

FR / Leather Welding Trousers

FR Clothing Range

- Reinforced front made of durable grade-A split leather to withstand the exposure to welding spatter
- Meets EN ISO 11611:2015, Class 2A1 standards
- Top and bottom are made from flame-retardant 100% cotton denim.
- Reinforced Kevlar® stitching

[MORE INFO HERE](#)

FR denim combines with split grain leather to provide comfortable, durable and effective welding trousers. These trousers meet Class 2 protection which inspires confidence of the ultimate protection even in the most demanding situations.

The leather front is layered on top of 100% cotton FR denim to allow for advanced protection without sacrificing comfort. Using a traditional 4-pocket design, the front pockets are protected by a full hook-and-loop closure, while the rear pockets are protected by a snap-over closure to prevent hot material intrusion. A protected button fly completes the fit, allowing for maximum comfort. Adding to the convenience, there is a tool pocket along the right thigh.

MORE INFO HERE

The ESAB protective clothing range is designed for protection during heavy duty welding.

Class 2-recommended for manual welding techniques with heavy formation of spatters and drops e.g. MMA welding (with basic or cellulose-covered electrode), MAG welding (CO₂ or mixed gases), MIG welding (with high current), self-shielded flux cored arc welding, plasma cutting, gouging, oxygen cutting, thermal spraying for operation of machines e.g. in confined spaces, at overhead welding / cutting or in constrained positions. This clothing is intended to protect against flames, molten metal, spatter, radiant heat and short term, accidental electrical contact.

Work Gloves

Work Gloves Range

W1000 (drivers)

W2000 (rigger)

W3000 (drivers)

- Drivers and rigger style options
- Gathered cuffs help keep the glove perfectly positioned
- Optimized materials and designs for a wide range of applications
- Not intended for welding applications

[MORE INFO HERE](#)

Picking up where welding gloves leave off, premium, general-purpose work gloves protect the hands against cuts and abrasion. Drivers style work gloves (W1000 and W3000) deliver simple, durable protection with all-day comfort. The W2000 rigger style glove meets the toughest conditions in a comfortable, gauntlet-cuff glove. The W3000 drivers work glove adds the durability of full grain cow leather and a cold-weather lining, while the W1000 driver's work glove utilises unlined goatskin for the ultimate balance in hand protection, comfort, dexterity and durability.

Heavy Duty Gloves

MIG / MMA Glove Range

M1050

M3050

- Durable, premium split leathers to withstand MIG / Stick welding abuse
- Kevlar® stitching throughout
- Weltd seams
- Reinforced thumb on select models
- Wide split leather cuffs allow fast removal

M2000

Heavy Duty Aluminized

[MORE INFO HERE](#)

A comprehensive range of professional heavy-duty MIG / MMA welding gloves with premium materials and upgraded features and options. From a simple, occasional-use split leather Stick welding glove such as the M1050, right through to the M3050 premium, all-day MIG glove, the ESAB heavy duty range covers all levels of welding protection.

All options feature a wide and rugged split leather gauntlet cuff with added levels of comfort and durability through premium top leather and strategically-placed split leather where it's needed most.

An aluminized glove is also available when welding in the most extreme situations.

TIG Gloves

TIG Glove Range

T1000

T2000

T3000

- Unlined for maximum comfort and feel
- Premium goatskin hand on T1000
- Premium sheepskin hand on T2000 and T3000
- Strategically-placed cushioning on T2000 and T3000
- Gauntlet designed for easy donning and doffing

[MORE INFO HERE](#)

Finding the right TIG glove is critical for the delicate tasks associated with precision welding. ESAB TIG gloves include premium-grade goatskin or sheepskin on the glove hand which is essential to maintaining fine dexterity while maximizing protection. A generous, heavy-duty split leather cuff keeps spatter off the wrist and covers the gap between the hand and welding jacket. Premium additions for the ultimate welding experience include strategically-placed cushioning, hemmed cuff and carefully-designed Fourchette fingers. Optimal thumb configuration for total dexterity and full Kevlar® stitching adds premium value to every model.

WeldOps GS-300 Clear; DIN Shade 5

Dual-material frame with multiple anti-scratch lens options

Safety Goggles

WeldOps GS-300

- Indirect venting protects against chemical splashes
- Ultra-soft face seal conforms to most facial profiles
- Wide, adjustable elastic strap
- Low-profile anti-fog coated lens
- Meets CE, UKCA, ANSI, and CSA requirements

Safety Glasses

WeldOps XF-400

- Half-frameless lens increases low-angle viewing
- Bayonet-style temple with dual material cushions and grips to comfortably stay in place
- Includes handy microfibre storage bag
- Anti-scratch coating enhances life of lens
- Meets CE, UKCA, ANSI, and CSA requirements

[MORE INFO HERE](#)

WeldOps GS-300 goggles feature indirect venting to guard against chemical splashes while still permitting airflow. An ultra-soft face seal allows a perfect fit on most facial profiles. The wide, adjustable elastic strap ensures a tight fit, and the low-profile anti-fog coated lens delivers clear vision in all conditions. Available in a clear or shade 5 lens for brazing, make these your go-to safety goggles for maximum protection and comfort on the job.

WeldOps XF-400 eyewear is made to handle any job in style, including drilling, chipping and metalworking. Its sleek half-frame design enhances low-angle viewing, and the bayonet-style temples with dual-material cushions and grips ensure a comfortable and secure fit. The included microfibre storage bag and anti-scratch coating protect and extend lens lifetime. Don't settle for less – upgrade to WeldOps XF-400 for stylish, durable eye protection. Available in four lens colours.
