Fall Protection

3M Fall Protection solutions.

At 3M Fall Protection our mission is to bring every worker at height home safely.

Every day on your job, you climb to new heights with two things in mind: getting your work done well and returning home safely to those you love.

Our job? Helping you get there. With our two brands, DBI-SALA® and Protecta®, we offer solutions for all your work at height needs.

Respiratory Protection

3M™ Respiratory Protection Solutions

Disposable Respirators

Disposable respirators are an excellent choice for workplaces where cleaning and maintenance is not practical.

Constructed from advanced materials, including 3M™ Advanced Electret Filter Media, 3M™ Disposable Respirators are designed for comfort and protection, allowing your team to give their best.

Reusable Respirators

Reusable respirators can help to reduce cost and waste* in workplaces where regular cleaning and maintenance is possible.

Designed to be easy-to-use and utilising comfortable, durable materials, 3M™ Reusable Respirators will help to give your team confidence in their protection.

Powered and Supplied Air Respirators

Powered and supplied air respirators can integrate head, eye, face, hearing and respiratory protection, while keeping your team comfortable for long periods.

Designed to be adaptable for different conditions, 3M™ Powered and Supplied Air Respirators will help to protect your team in demanding environments.

*Compared to daily usage and disposal of disposable respirators, when the reusable respirator is properly maintained.

	Disposable Respirators	Reusable Respirators	Powered and Supplied Air Respirators
Can provide protection from particulate hazards (e.g. dust, mists, metal fumes)	✓	✓	✓
Can provide protection from gas and vapour hazards (e.g. solvents)	✗	✓	✓
Requires cleaning and maintenance	✗	✓ ¹	✓
Options for wearers who have facial hair	✗	✗	✓
Options for companies who prefer not to face-fit test ²	✗	✗	✓ ²

1. Maintenance-free options are available. For example the 3M™ Maintenance Free Reusable Respirator 4000+ Series

2. Face-fit testing is a legal requirement in some countries, and is always 3M recommended best-practice, for tight-fitting respirators.

Filtering Facepiece Respirators

Selecting a Filtering Facepiece Respirator

	FFP1 	FFP2 	FFP3 
Nominal Protection Factor	NPF 4	NPF 12	NPF 50
Typical Applications	Low levels of fine dust particles and oil or water based mist typically found during hand sanding, drilling and cutting	Moderate levels of fine dust particles and oil or water based mist typically found during plastering, cement, sanding and wood dust	Higher levels of fine dust particles and oil or water based mist typically found when handling hazardous powders found in the pharmaceutical industry or work with biological agents and fibres

Nominal Protection Factor (NPF): The theoretical protection level of a respirator based on laboratory measured performance data.

Types of Filtering Facepiece Respirator

3M™ Flat-Fold Respirators

- Ultra soft, flexible and comfortable fit resulting from the multiple panel design
- Comfort Series - Flat Fold only: Individually packed, foldable design prevents contamination before use and allows easy storage

3M™ Cup-Shaped Respirators

- Convex shape, nose clip and twin strap design
- Easy to fit
- Durable, collapse resistant shell

3M™ Cool Flow™ Valve

Effective removal of heat build-up provides a cooler and more comfortable wear

- Provides longer continuous wear time
- Reduces risk of fogging of spectacles and eyewear

3M™ Buckle Strap Respirators

- Robust and durable design provides multishift capability and secure feel
- Adjustable braided headbands
- Soft inner face-seal improves comfort

Respiratory Protection

Disposable Respirators

3M™ Aura Particulate Respirators 9300+Gen3

3M™ Aura™ Particulate Respirator 9300+Gen3 Series is the third generation of the best-selling 3M™ Aura™ flat fold respirator.

- Original 3-panel, flat-fold design fits a wide range of face shapes and sizes
- 3M™ Cool Flow™ Comfort Valve allows a greater percentage of warm, exhaled air to escape, helping to increase your comfort. *compared to 3M™ Aura™ 9300+ equivalent model
- 3M™ Advanced Electret (filter) Media helps you breathe easier

Product ID	Part Number	Product	MOQ	OU
7100138120		3M™ Aura™ Particulate Respirator, FFP2, Valved, 9322+Gen3-SP		Each
7100138357		3M™ Aura™ Particulate Respirator, FFP3, Valved, 9332+Gen3-SP		Each

3M™ Aura™ Particulate Respirators 9300+ Series

3M™ Aura™ Particulate Respirators 9300+ Series has an ergonomic, flat-fold, 3-panel design featuring a low breathing resistance filter media. Available in FFP1, FFP2 and FFP3 protection levels, and with valved and unvalved models, our respirators feature an innovative chin tab for easy adjustments and an embossed, sculpted upper panel to help reduce eyewear fogging.

- Original 3-panel design allows for greater facial movement
- Low resistance filter technology helps you breathe easily
- Available with 3M™ Cool Flow™ Valve which helps reduce heat build-up

Product ID	Part Number	Product	MOQ	OU

3M™ Particulate Respirators 8000 Series

The 3M™ Particulate Respirator 8000 Series is our range of cup-shaped respirators, with a lightweight, twin-strap design. They provide FFP1, FFP2 and FFP3 respiratory protection, with a convex shape, nose foam and adjustable nose clip that helps you get a comfortable fit across a broad range of face sizes.

- Robust, cup-shaped respirators
- FFP1 (NPF 4), FFP2 (NPF 12) and FFP3 (NPF 50) protection against dusts and mists
- Lightweight, twin-strap design, nose foam and nose clip help provide a comfortable, custom fit

Respiratory Protection

3M™ Speciality Particulate Respirators 9900 Series

3M™ Speciality Particulate Respirators provide lightweight and comfortable FFP1, FFP2 and FFP3 breathing protection against organic vapours, acid gases, ozone, hydrogen fluoride, and nuisance odours. Our respirators have an activated carbon layer that provides relief against nuisance-level odours. The convex shape, soft inner face seal, nose clip and twin strapping helps adjust to a broad range of faces, and the braided, colour-coded headbands help you quickly identify their protection level.

- Provides FFP1 (NPF 4), FFP2 (NPF 12), and FFP3 (NPF 50) protection against dusts and mists
- Activated carbon layer helps guard against nuisance odours and, in some models, low levels of organic vapours, acid gases and ozone (NPF 10)
- Convex shape, nose clip and twin strapping helps provide a comfortable fit across a broad range of face shapes

Product ID	Part Number	Product	MOQ	OU

3M™ VFlex™ Particulate Respirators 9100 Series

3M™ VFlex™ Particulate Respirators provide economic protection and have a compliant V-shaped pleat design with a proprietary 3M filter material that helps make breathing easier. Our respirators feature an embedded, adjustable metal nose clip for a custom fit and side tabs for easier positioning on your face. The flat-fold design makes storage easy and they're available in two sizes.

- Economic respirator solution
- V-shaped pleats flex and expand around your mouth for unrestricted comfort
- Proprietary 3M filter material helps you breathe easier

Respiratory Protection

3M™ Aura™ Particulate Healthcare Respirator 1800+ Series

3M™ Aura™ Particulate Healthcare Respirator Series 1800+ feature a low breathing resistance filter media in an ergonomic, flat-fold, 3-panel design that's engineered to fit a broad variety of face shapes and sizes. Available in FFP1, FFP2 and FFP3 protection, these comfortable respirators are for use in medical environments where health care workers will be exposed to hazardous particulate contaminants.

- Unvalved and Shrouded valve models are approved to the European Medical Device Directive (93/42/EEC) and EN14683:2005 Type IIR for use as surgical masks
- Original 3-panel design allows greater facial movement and wide-ranging fit
- Low resistance filter technology helps you breathe easily

Half Mask Respirators

3M™ Maintenance Free Reusable Respirators 4000+ Series

3M™ Maintenance Free Reusable Respirators 4000+ Series are a range of simple and ready-to-use respirators with integrated cartridge and filters. A newly enhanced valve assembly helps to reduce exhalation breathing resistance, and the close-fitting, non-silicone, textured face seal is soft and non-allergenic. Includes a resealable bag for hygienic storage and transportation.

- A newly enhanced valve assembly helps to reduce exhalation breathing resistance for improved breathing comfort
- Lightweight, well-balanced design
- Integrated filters mean it's ready to use and maintenance free

3M™ Reusable Half Mask Respirator 7500 Series

3M™ Reusable Half Face Masks 7500 Series have a bayonet-style twin-filter design that fits a broad range of 3M lightweight filters. Our 7500 Series reusable masks have a 3M™ Cool Flow™ Valve, a soft sealing surface for comfort, and a unique head harness with an optional drop-down strap.

- Soft sealing surface and low breathing resistance makes them comfortable to wear for long durations
- Cool Flow™ Valve helps reduce heat build-up by allowing warm, exhaled air to escape
- Twin-filter design for even distribution of weight and minimal obstruction to field of vision

3M™ Reusable Half Mask HF-300 Series

3M™ Reusable Half Mask, HF-300 Series, has been designed with user comfort and convenience in mind. Compatible with DIN threaded, 3M™ Filters DT-Series, the HF-300 offers protection against a wide range of respiratory hazards. Convenient for workplaces where different types of respiratory protection are used, the HF-300 shares the DT-Series filter range with the 3M™ Powered Air Respirator PF-600 Series and the 3M™ Reusable Full Face Masks, FF-300 and FF-600 Series, minimising the number of filter types that must be kept in stock. Please note, the 3M™ Reusable Half Mask, HF-300 Series, was previously named the Scott™ AVIVA 40 Reusable Half Mask.

- Compatible with the 3M™ Filters DT-Series
- Available in three sizes
- Available as a ready to use kit, complete with respirator and filters

3M™ Maintenance Free Reusable Respirators 0694X+

3M™ Maintenance Free Reusable Respirators 0694X+ Series are a range of simple and ready-to-use respirators with integrated cartridge and filters. A newly enhanced valve assembly helps to reduce exhalation breathing resistance, and the close-fitting, non-silicone, textured face seal is soft and non-allergenic. Includes a resealable bag for hygienic storage and transportation.

- A newly enhanced valve assembly helps to reduce exhalation breathing resistance for improved breathing comfort
- Lightweight, well-balanced design
- Integrated filters mean it's ready to use and maintenance free

Full Face Respirators

3M™ Reusable Full Face Mask 6000 Series

3M™ Reusable Full Face Masks 6000 Series have a large polycarbonate lens and soft, elastomeric facepiece. The 3M™ Bayonet Connection System enables you to connect to a broad range of 3M twin lightweight filters. The 6000 Series is lightweight and features a 3M™ Cool Flow™ Valve and four-strap suspension.

- Soft, elastomeric facepiece for wearer comfort
- Four-strap suspension means the mask is easy to put on and take off
- Large polycarbonate lens offers good visibility and that complies to relevant performance requirements of EN166:B

3M™ Reusable Full Face Mask Respirator FF-300 Series

3M™ Reusable Full Face Mask Respirator FF-300 Series is our multi-function full-face mask designed to provide durable and comfortable protection against a wide range of respiratory hazards. Use in conjunction with approved 3M powered air systems or as a negative pressure respirator with the 3M™ DT Series filter range, providing protection against a wide range of industrial hazards.

- Use as a negative-pressure single-filter mask or as a face piece for a powered air respirator
- Sweat port helps to improve user comfort during long periods of use
- Visor provides a good field of view and comes in choice of polycarbonate or high-heat material

Product ID	Part Number	Product	MOQ	OU
7100236989		3M™ Full Facepiece Reusable Respirator, Medium/Large, FF-302		Each
7100237033		3M™ Full Facepiece Reusable Respirator, Small, FF-301		

Respiratory Protection

3M™ Reusable Full Face Mask Respirator FF-600 Series

3M™ Reusable Full Face Mask, FF-600 Series features a panoramic visor that is designed to prevent visual distortion and allows for a virtually unrestricted field of vision. Compatible with the 3M™ Filters, DT Series, and with options suitable for use as part of a powered air system, the FF-600 is suitable for a wide range of wearers and applications. Please note, the 3M™ Reusable Full Face Mask, FF-600 Series, was previously named the Scott™ Vision 2 / FM4 Reusable Full Face Mask.

- Designed with features to enhance user comfort, including a soft, flexible liquid silicone rubber facepiece, adjustable 5 point head harness and a panoramic visor
- Compatible with the 3M™ Filters DT-Series, or can be used as a facepiece for the 3M™ Powered Air Respirator PF-600E+ Series (FF-600 only)
- Available in three sizes, each with a choice of front-fitting (FF-600F) or side-fitting (FF-600) filter ports

Product ID	Part Number	Product	MOQ	OU
7100236941		3M™ Full Facepiece Reusable Respirator, Medium, FF-602

3M™ Particulate Filters

3M™ Particulate Filters provide protection against a wide range of dusts, mist and other particles. 3M particulate filters offer low breathing resistance and good balance with a slim, swept back profile, designed to optimise your field of vision when wearing the respirator. Selected filters in the range can be used in conjunction with a 3M™ 501 filter retainer and a 3M™ Gas & Vapour Filter to provide combined gas, vapour and particulate protection.

- Protects against a range of dusts, mists and particulates
- Options for P1, P2 or P3 protection
- Features the 3M Bayonet style connection

Filter selection guide.

Application	Hazard	Typical Protection Considered
Painting, Spraying, Varnishing, Coating (Non Isocyanates** based)	Solvent-Based Paint**	A2P3 R
	Anti-Fouling Paint Spraying / Grinding	A2P3 R
	Water Soluble Paint	A1P2 R
	Solvents, Resins, Synthetic Resins**	A2P3 R
	Latex-Paint, Residual Solvents	A2P3 R
	Wood Preservatives	A1P2 R
Maintenance	Disinfection, Cleaning*	ABEK1P2 R
Decoration	Spray-On Glue, Foam, Varnish, Adhesive	A1P2 R
Waste Removal	Bacteria, Spores, Odours	A1P2 R
Agriculture	Pesticides, Insecticides	ABEK1P2 R
Wood Treatment	Bonding, Spray-On Glue	A2P3 R
Construction, Grinding, Cutting, Drilling	Tarring	A2P3 R
	Sealing	A1P2 R
	Spray Foam Insulation	A1P2 R
Coating	Organic Solvent/with boiling point less than 65 C	AXP3 R
	Ammonia Based Paint Remover	ABEK
	Polyurethane Coating**	ABEK1P3 R
	Solvent Based Varnish	A2
	Water Based Varnish	A1
Bonding	Solvent containing Adhesives	A1
Handling	Sulphur Dioxide	ABE
	Hydrochloric Acid	ABE
	Liquid Manure	ABEK
	Ammonia	K
	Formaldehyde	A1 + Form
	Hazardous goods storage/transport	ABEK1P3 R

Warning:
This guide is only an outline. It should not be used as the only means for selecting a respirator. Details regarding performance and limitations are set out on the respirator package and user instructions. Before using any of these respirators, the wearer must read and understand the user instructions for each product. Specific country legislation must be observed.

* excluding Formaldehyde

** for occurrence of Isocyanates, please contact the 3M Customer Helpline +44 (0) 870 60 800 60 or your local 3M office

What types of filters are there?

Filter Type	Colour	Main area of application
P	White	Solid and liquid particles
A	Brown	Organic gases and vapours with boiling point >65°C.
AX	Brown	Highly volatile organic solvents with boiling point <65°C.
B	Grey	Inorganic gases
E	Yellow	Acid Gases
K	Green	Ammonia and organic ammonia derivatives
Hg	Red	Mercury (vapour) and mercury compounds

Filter Classification	APF with 3M Half Mask	APF with 3M Full Face Mask
P1	4	4
P2	10	10
P3	20	40
Class 1 Gas and Vapour filters	10 or 1000ppm (whichever is lower)	20 or 1000ppm (whichever is lower)
Class 2 Gas and Vapour filters	10 or 5000ppm (whichever is lower)	20 or 5000ppm (whichever is lower)

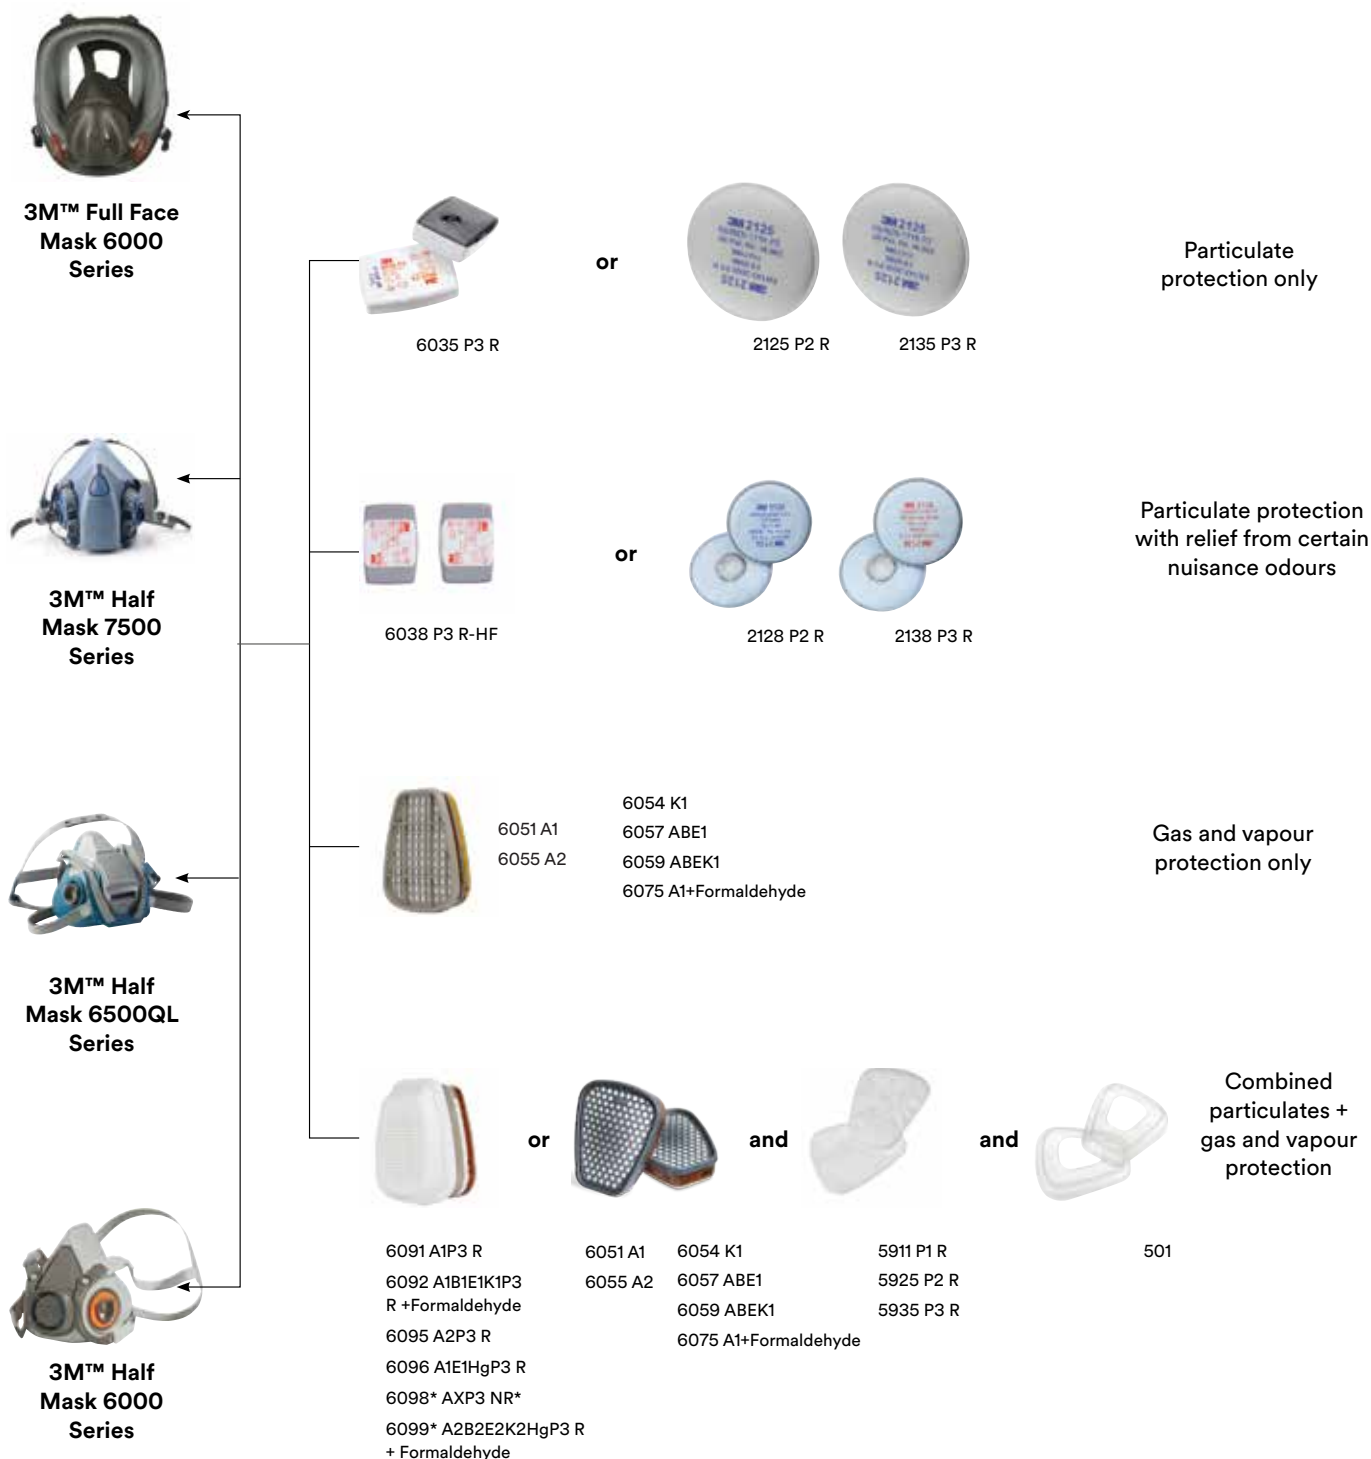

AX-Filter for low boiling point (organic composition with a low boiling point under 65 °C). AX-Filter should only be fitted to 3M™ Full Face masks. AX filters may only be used for a single shift.
A1 and A2 Filter for organic vapour with a boiling point above 65 °C.

APF = Assigned Protection Factor (For further information on APFs see HSE document HSG53)

Select the right respirator and filter.

Powered Air Respirator Systems

3M™ Versaflo™ Powered Air Respirator Systems TR-300+ Series

3M™ Versaflo™ Powered Air Turbo Unit TR-302E+ is slim, lightweight and well-balanced, with two selectable flow rate options of 185 l/min and 205 l/min. Our unit has an intelligent lithium ion battery and charge indicator and features visual and audible alarms to signal low air flow and low battery levels.

- Combines with 3M™ Versaflo™ components to build a complete system
- Respiratory protection against dusts, mists, fumes and other particulate hazards, and nuisance-level organic vapour and acid gas
- Versatile and easy-to use

Respirator Fit Testing

3M™ Training and Fit Testing Kit

Test kits and accessories designed to help your organisation meet regulatory fit testing requirements for tight fitting respirators. The kits can be used to validate face to respirator seal on any disposable respirator or half mask respirator. Not suitable for fit testing full facepiece respirators - this must be through Quantitative face fit testing.

- Fit test kits and accessories can be used to check respirator fit
- FT-10 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- FT-30 uses a test solution of denatonium benzoate to produce a bitter tasting aerosol

Product ID	Part Number	Product	MOQ	OU
7000002042	FT30	3M™ Fit Test Kit, Qualitative, Bitter, FT-30		Each
7000001898	FT10	3M™ Fit Test Kit, Qualitative, Sweet, FT-10		Each

3M™ Fit Test Collars

The 3M™ Fit Test Collar FT-15 is used with 3M™ Qualitative Fit Test Apparatus Kit FT-10 Sweet and FT-30 Bitter as the test environment.

- Collar for fit testing; to be used in conjunction with 3M™ Test Hood FT-14
- Used with the 3M™ Qualitative Fit Test Apparatus FT-10, FT-30 and 3M™ Training and Fit Testing Case FT-20
- Can be used to validate face-to-respirator seal on any disposable respirator or half mask respirator

Product ID	Part Number	Product	MOQ	OU
7000051789	FT15	3M™ Fit Test Collar, FT-14		Each

3M™ Nebulizer FT-13

Replacement nebulizer used with the 3M™ Qualitative Fit Test Apparatus FT 10, FT 30 and the 3M™ Training and Fit Testing Case FT 20.

- A replacement part for 3M™ Qualitative Fit Test Apparatus Kits FT-10 Sweet and FT-30 Bitter
- Fast, easy method for performing qualitative fit testing
- Used with the 3M™ Qualitative Fit Test Apparatus FT-10, FT-30 and the 3M™ Training and Fit Testing Case FT-20

Product ID	Part Number	Product	MOQ	OU
7000001897	FT13	3M™ Nebulizer, FT-13		Each

Respiratory Protection

3M™ Sensitivity Solution

3M™ Sensitivity Solutions are used to test the sensitivity of the respirator wearer to a sweet or bitter solution. For use with 3M™ Qualitative Fit Test Apparatus Kits FT-10 (Sweet) and FT-30 (Bitter)

- Sweet or bitter taste sensitivity solutions for fit testing
- 3M™ Sensitivity Solution, Sweet, FT-11 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- 3M™ Sensitivity Solution, Bitter, 55ml, FT-31 uses a test solution of denatonium benzoate to produce a very bitter taste

Product ID	Part Number	Product	MOQ	OU
7100004635	FT31	3M™ Sensitivity Solution, Bitter, 55ml, FT-31		Each
7000029587	FT11	3M™ Sensitivity Solution, Sweet, 55ml, FT-11		Each

3M™ Fit Test Solution

Replacement fit test solutions for use with 3M™ Qualitative Fit Test Apparatus Kits FT-10 (Sweet) and FT-30 (Bitter). The choice between the bitter and sweet test kit is a personal one, however a small percentage of the population are unable to detect saccharin in which case the bitter test must be used.

- Sweet or bitter taste fit test solutions for fit testing
- 3M™ Fit Test Solution, Sweet, FT-12 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- 3M™ Fit Test Solution, Bitter, FT-32 uses a test solution of denatonium benzoate to produce a bitter aerosol

Product ID	Part Number	Product	MOQ	OU
7100004634	FT32	3M™ Fit Test Solution, Bitter, 55ml, FT-32		Each
7100004636	FT12	3M™ Fit Test Solution, Sweet, 55ml, FT-12		Each

3M™ Secure Click™ Quantitative Fit Test Adapter Kits

3M™ Secure Click™ Quantitative Fit Test Adaptor Kits are for conducting quantitative fit testing on 3M™ Secure Click™ Reusable Respirators. Filters are not included.

- Use to conduct quantitative fit testing on 3M™ Secure Click™ Reusable Respirators with speaking diaphragm
- Includes head harness assembly
- Not for use with 3M™ Secure Click™ Respirators without Speaking Diaphragm - for these respirators manually probe the respirator

Product ID	Part Number	Product	MOQ	OU
7100181558		3M™ Secure Click™ Quantitative Fit Test Adapter Kit, for 3M™ Secure Click™ Half Mask HF-800 Series, HF-800-03		Each

■ Respiratory Protection

3M™ Fit Test Adapters

For an alternative method to sharing a probed fit testing respirator, use 3M™ Quantitative Fit Test Adapters. Our fit test adaptor kits allow you to fit test with a personal 3M™ Respirator, rather than using a shared probed fit test respirator.

- Adapter allows fit testing with an individual's personal 3M™ Respirator
- Alternative to sharing a probed fit testing respirator
- Quick and easy to fit

Detection & Monitoring Equipment

Detection & Monitoring Equipment

Gas Detectors & Monitors

3M™ Organic Vapor Monitor 3500+

3M™ Organic Vapour Monitor 3500+ is a cost-effective and convenient way to perform personal air sampling for many organic vapours.

It is easy to use - clip it to your shirt lapel, collar, or pocket without interfering with your work activities. No batteries, hoses or pumps or needed to use the monitor to sample your air.

- State of the Art Monitor Design
- Simple, cost-effective and convenient
- High sample capacity for sampling a broad range of organic vapours

Product ID	Part Number	Product	MOQ	OU
7100249088		3M™ Organic Vapour Monitor, 3500+		Each

3M™ Organic Vapour Monitor 3501+

3M™ Organic Vapour High Sampling Rate Monitor 3501+ is a cost-effective and convenient way to perform personal air sampling for low levels of organic vapours and short term exposure limit (STEL) sampling.

It is easy to use - clip it to your shirt lapel, collar, or pocket without interfering with your work activities. No batteries, hoses or pumps or needed to use the monitor to sample your air.

- State of the Art Monitor Design
- Simple, cost-effective and convenient
- Highest diffusive sampling rate available for monitoring low contaminant levels and STEL sampling

Product ID	Part Number	Product	MOQ	OU
7100249097		3M™ Organic Vapour Monitor, High Sampling Rate, 3501+		Each

3M™ Ethylene Oxide Monitor 3551+

3M™ Ethylene Oxide Monitor Badge, 3551 is a lightweight device that collects ethylene oxide gas in the surrounding environment. Our badge is made from a plastic housing that contains a permeable, absorbent membrane which can be lab tested to help you assess the airborne concentration of ethylene oxide.

- Collect and separately analyse ethylene oxide in the workplace environment
- Accuracy of +/-25%, at a 95% confidence level for many workplace contaminants
- Lightweight

Product ID	Part Number	Product	MOQ	OU
7100249356		3M™ Ethylene Oxide Monitor, 3551+		Each

■ Detection & Monitoring Equipment

3M™ Formaldehyde Monitor 3721+

3M™ Formaldehyde Monitor 3721+ is a cost-effective and convenient way to perform personal air sampling for formaldehyde and certain other aldehydes.

It is easy to use - clip it to your shirt lapel, collar, or pocket without interfering with your work activities. No batteries, hoses or pumps or needed to use the monitor to sample your air.

- State of the Art Monitor Design
- Simple, cost-effective and convenient
- A valid method for air sampling and analysis of formaldehyde and certain other aldehydes

Product ID	Part Number	Product	MOQ	OU
7100251921		3M™ Formaldehyde Monitor, 3721+		Each

Hearing Protection

40 million workers are exposed to loud noise and 13 million suffer from hearing disorders despite industry regulations*. You can advance your hearing conservation programme with a customised and comprehensive approach to the hearing protection challenge. Implementing a solution that really makes a difference begins with understanding the hazards, the regulation and the factors that impact protection.

The real world concerns of hearing protection

Variable Noise Levels: Every environment is different and workers can face a wide range of sound levels throughout the day and in different areas at the same facility.

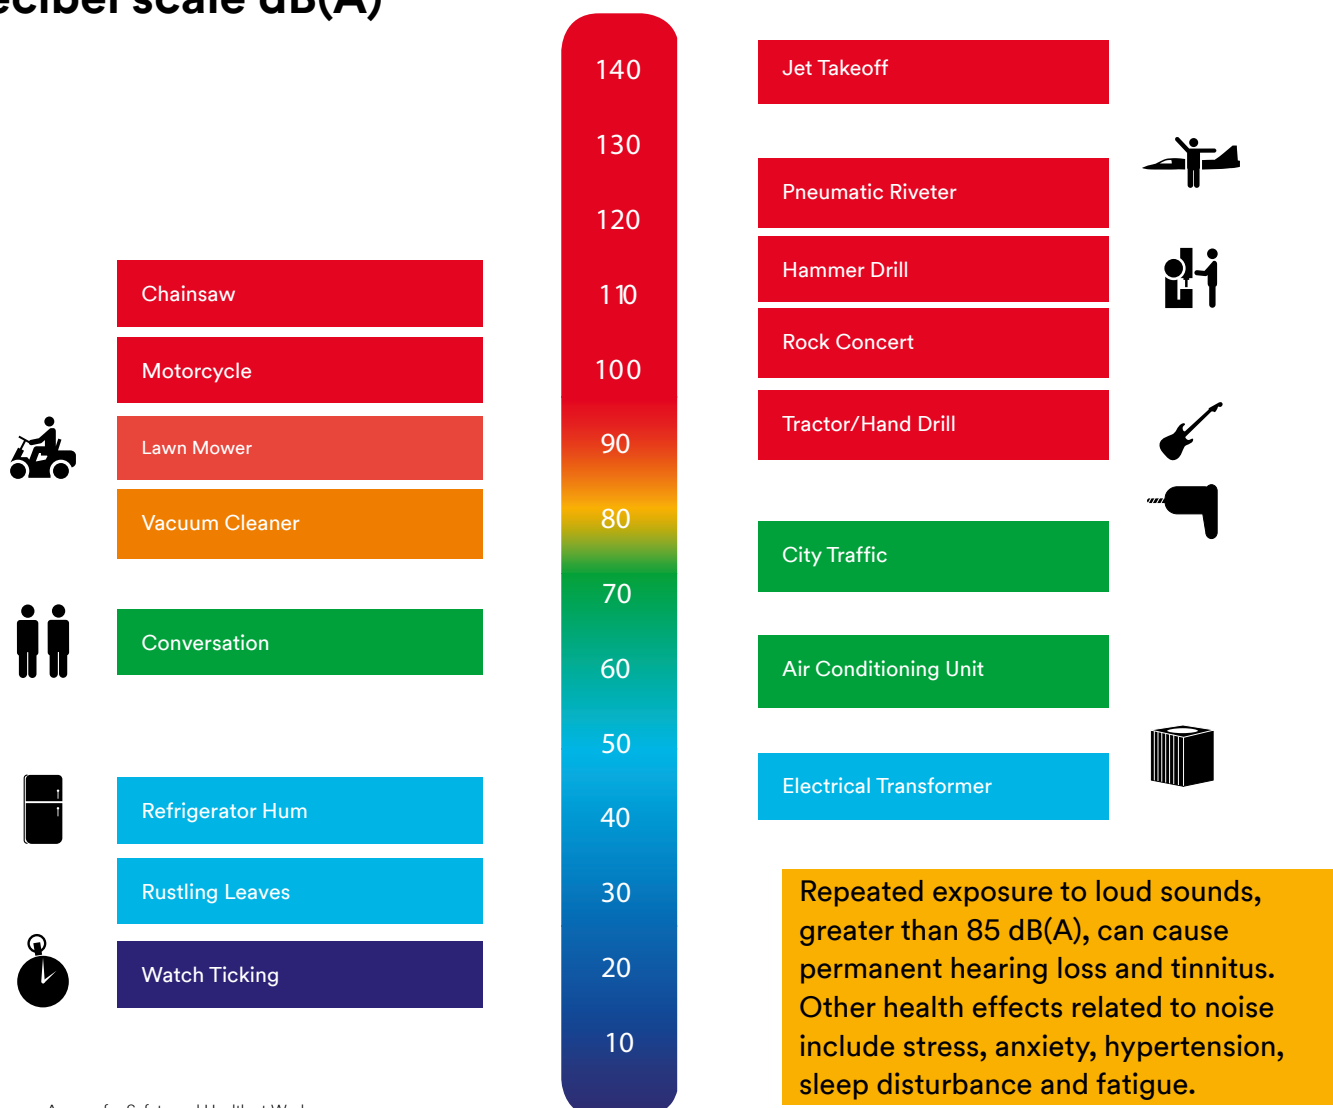

The Human Factor: Each person has a different shape, size and anatomy of the ear canal, so there is no one-size fits all hearing protection solution. The key to achieving optimal protection is having the best fit possible.

Employee Communication: Where there is an essential need for workers to communicate or hear warning sounds it is vital that their hearing is protected from hazardous noise levels.

What types of sounds require hearing protection?

At home and work, it's important to understand which sounds may cause hearing loss and require hearing protection:

Decibel scale dB(A)

Ear fit validation

How do you decide what hearing protection you will offer to your workers?

If you are simply using the SNR found on the hearing protection packaging as a guide you may not be providing accurate protection levels for every worker. Ears come in many shapes and sizes and to make sure all workers are getting the protection they need, you need to know their Personal Attenuation Rating (PAR).

Noise-induced hearing loss is 100% preventable.

Why 3M?

As the leader in hearing protection, 3M offers a complete solution, with dual-ear and earmuff testing capabilities plus a user-friendly interface. The 3M™ E-A-Rfit™ Dual-Ear Validation System is the fast and easy way to find your employees' PAR, because we know how important it is to make your hearing conservation program fit seamlessly into your operation.

Learn more: 3M.co.uk/Earfit

What's your PAR?

Every employee is different.
Every job is different.
Every ear is different.

Finding each employee's PAR will help you have assurance that workers' hearing is protected and they are compliant with the law. That's why we made the new 3M™ E-A-Rfit Dual-Ear Validation System fast, accurate and easy.

Fit testing is key

Get results you can trust. The 3M™ E-A-Rfit™ Dual-Ear Validation System measures the effectiveness of the earplug or earmuff inside the employee's ear providing accurate, quantitative results. Because you can simultaneously test both ears, you have more to focus on education including the importance of fit and protection.

1 Fit

Have the employee insert their hearing protection.

2 Test

Connect to microphones and begin speaker test sound.

3 Assess

Use PAR to customise hearing protector selection.

Hear for life.

The importance of hearing
protections performance
and selection.

Personal Protective Equipment used to control exposure to harmful noise needs to be CE approved against the PPE Regulation 2016/425 (EU).

This is typically done by testing the hearing protector
against relevant parts of the Harmonised European
Standard EN 352.

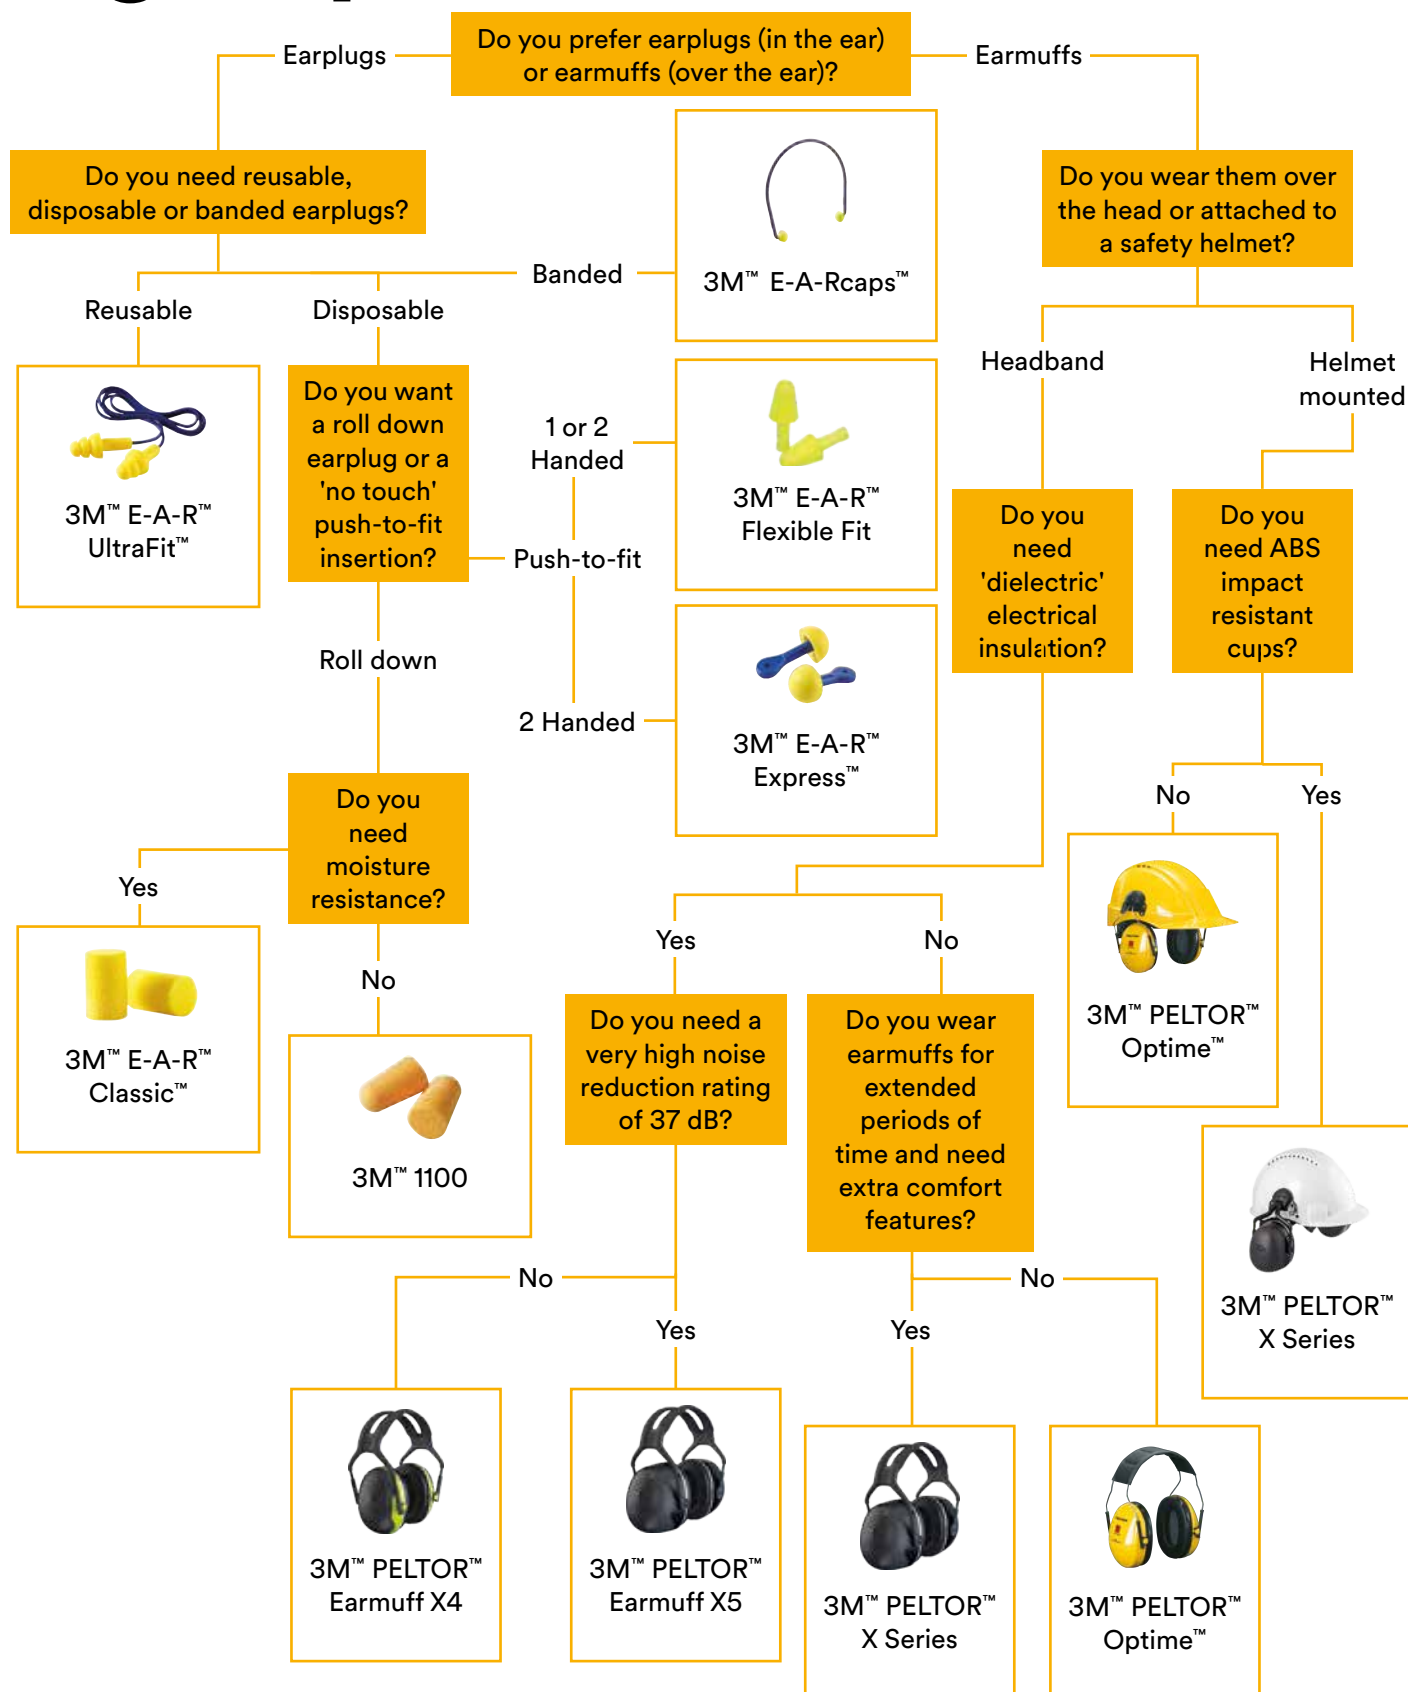

Did you know that the EN 352 family of standards have recently undergone a periodic revision?

3Ms technical experts can help explain how
attenuation testing is performed, the differences
in reporting test results and product performance.
These are some of the key factors to help make an
informed choice on the selection of the right hearing
protection for the job.

Hearing protection use and care

Roll down earplugs

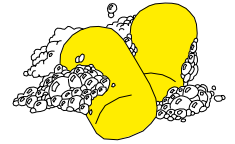

How to use

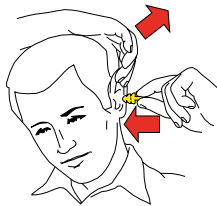

Slowly roll and compress foam earplugs into a very thin cylinder. While compressed, insert the earplug well into the ear canal. Fitting is easier if you reach around the head to pull the ear outward and upward during insertion.

Care and cleaning

Keep the earplugs clean and free from material that can irritate the ear canal. Wipe dirt and debris from earplugs with a clean cloth between uses. Discard the earplugs if they noticeably change their firmness or do not re-expand to their original size and shape.

Reusable pre moulded earplugs

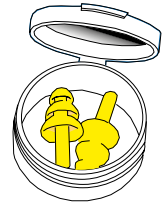

How to use

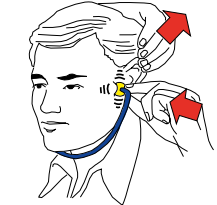

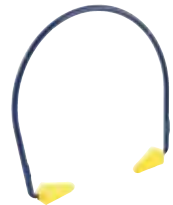

Reach around the back of your head and pull outward on the ear while inserting the plug until you feel it sealing. This may seem tight at first, especially if you have never worn earplugs.

Care and cleaning

Pre-moulded earplugs could last several months depending on the type and on your work environment, hygiene and body chemistry. They should be replaced if they shrink, harden, tear, crack or become permanently deformed. Wash them in warm soapy water and rinse well. When dry, store them in a carrying case.

Banded earplugs

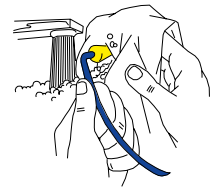

How to use

Hold the large ends of the pods and swivel them to direct the tips into the ear canal openings. Firmly push and wiggle the pods into the ear canal until a snug seal is obtained. Pulling on the outer ear while pushing the pods will be helpful to most wearers.

Care and cleaning

Most semi-aural hearing protectors can be cleaned in the same way as pre-moulded earplugs. Since the band holds the tips in place to provide an acoustic seal, do not tamper with it otherwise the protection afforded by the device may be reduced.

Earmuffs

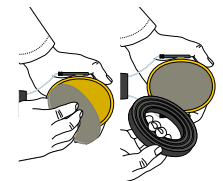

How to use

Earmuffs must fully enclose the ears to seal against the head. Adjust the headband so cushions exert even pressure around the ears to get the best noise reduction. Pull hair back and out from beneath the cushions. Do not wear caps, store pencils behind the ear or anything that may break the seal.

Care and cleaning

Cushions can be cleaned with warm soapy water and rinsed thoroughly. Do not use alcohol or solvents. Cushions normally need replacing at least twice a year or more – whenever they become stiff, cracked, or do not seal. Do not modify earmuffs in any way, and especially do not stretch or abuse the headband as this will reduce protection.

Fitting guide

3M™ E-A-R™ One Touch™ Pro Earplug Dispenser

Conveniently provide hearing protection where employees need it. The 3M™ One Touch™ Pro Earplug Dispenser dispenses one earplug at a time with a simple twist. No more expense and waste of individually wrapped plugs. Made from ABS plastic with a powder-coated steel-back plate, it's designed for challenging environments - indoors and outdoors.

- ▶ Accurately dispenses one earplug at a time
- ▶ Dispenses earplug directly into hand
- ▶ Powder coated steel back plate and durable ABS and POM plastic for tough environments
- ▶ Free-standing or wall-mounted, could be located inside or outside
- ▶ Mounting holes designed to fit a variety of competitive dispensers
- ▶ The innovative design protects against sun, rain and wind, when dispensing earplugs outside

3M™ E-A-R™ Flexible Fit Earplugs

3M™ E-A-R™ Flexible Fit HA Earplugs are our safety ear plugs made from a patented foam formulation which makes them fully washable and reusable. They feature soft foam tips and a flexible fitting stem for easy insertion using one or two hands. The foam tip conforms to the unique shape of the ear canal to help block out noise.

- Firm, yet flexible stem for one or two hand insertion
- Single Number Rating (SNR) 35 dB (two-hand insertion) and 30 dB (one-hand insertion)
- Soft foam stem for secure grip

Hearing Protection

3M™ E-A-Rsoft™ 21 Earplugs

The 3M™ E-A-Rsoft™ 21 Earplugs are disposable and designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise and loud sound. These earplugs seal the entrance part of the ear canal and may be used for protection against low to moderate noise environments, providing effective protection across all test frequencies.

- Slow expanding, soft polyurethane foam for all day comfort
- Requires no roll down
- Available as an uncorded model only

Product ID	Part Number	Product	MOQ	OU
7000052712	ES01009	3M™ E-A-R™ E-A-Rsoft 21 Earplugs, 21 dB, Uncorded, 1000 Pairs/Box, ES-01-009	250 Per Pack	Pair

3M™ E-A-R™ Classic Earplugs

The 3M™ E-A-R™ Classic™ Earplugs are disposable and designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise and loud sound. These products are available in a corded and uncorded version.

- Reduces noise levels up to 28 dB (uncorded) and 29 dB (corded)
- Soft energy absorbing foam provides a low equilibrium pressure making it one of 3M's most comfortable earplugs
- Moisture resistant making them less likely to swell through moisture absorption

Product ID	Part Number	Product	MOQ	OU

3M™ E-A-R™ Classic™ Small Earplugs

The diameter of a Classic Small earplug is 7% less than the Classic earplug (and the same length) to help provide optimum comfort and protection in smaller ears.

- 3M™ E-A-R™ Classic™ Earplugs set the standard in hearing protection as the world's first foam earplugs
- Slow recovery, low pressure foam conforms to the shape of the ear canal for enhanced comfort and wearability
- Moisture-resistant material helps maintain a consistent expansion time, even in humid environments

Product ID	Part Number	Product	MOQ	OU
7000089396		3M™ E-A-R™ Classic™ Small Earplugs, 28 dB, Uncorded, 250 Pairs/Box, AM-01-001	250 Per Pack	250 Pairs / Box

Hearing Protection

3M™ E-A-Rsoft™ Yellow Neons™ Earplugs

The 3M™ E-A-Rsoft™ Yellow Neons™ Earplugs are designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise up to 36 dB. These products are available in a corded and uncorded version.

- Reduces noise levels up to 36 dB
- Brightly-coloured, neon-yellow earplugs are easy to identify in compliance checks
- Soft foam helps provide low pressure inside the ear canal

Product ID	Part Number	Product	MOQ	OU
7000052845	ES01005	3M™ E-A-R™ E-A-Rsoft™ Yellow Neons™ Earplugs, 36 dB, Corded, 200 Pairs/Box, ES-01-005	2000 Per Pack	Pair

3M™ E-A-Rsoft™ FX Earplugs

3M™ E-A-Rsoft™ FX™ Earplugs are comfortable bell shape and feature expandable super soft PU foam. They give our highest level of noise reduction, up to 39 dB.

- Reduces noise levels up to 39 dB
- Tapered design provides a good fit on a wide range of ear canal sizes
- Features super soft slow recovery PU foam providing a reliable seal

Product ID	Part Number	Product	MOQ	OU
7000052711	ES01021	3M™ E-A-R™ E-A-Rsoft™ FX Earplugs, 39 dB, Corded, 2000 Pairs/Box, ES-01-021	2000 Pairs / Box	Pair
7000052710	ES01020	3M™ E-A-R™ E-A-Rsoft™ FX Earplugs, 39 dB, Uncorded, 2000 Pairs/Box, ES-01-020	2000 Pairs / Box	Pair

3M™ E-A-Rsoft™ Metal Detectable Roll Down Ear Plugs

The 3M™ E-A-Rsoft™ Metal Detectable roll down ear plugs are designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise and loud sound. These products are available in corded version only.

- Extremely soft foam helps provide low pressure inside the ear canal thus increasing comfort and wearability
- Non-food blue metal detectable cord with an integral stainless steel ball in the ear plug makes it ideal choice for the food industry
- Tapered shape conforms quickly to most ear canals

Product ID	Part Number	Product	MOQ	OU
7000052715	ES01011A	3M™ E-A-R™ E-A-Rsoft™ Metal Detectable Earplugs, 2000 Pairs/Box, ES-01-011A	200 Per Pack	Pair

Hearing Protection

3M™ Earplugs 1100 Series

The 3M™ 1100 Earplugs are disposable foam earplugs designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise up to 37 dB.

- Reduces noise levels up to 37 dB
- Tapered design provides a good fit on a wide range of ear canal sizes
- Soft hypoallergenic foam softens with body temperature once inserted for comfortable extended wear

Product ID	Part Number	Product	MOQ	OU
7100100638	1110	3M™ Earplugs, 37 dB, Corded, 500 Pairs / Box, 1110	500	Pair

Validation

3M™ E-A-Rfit™ Dual-Ear Validation System

Fit testing is key for effective wear and hearing conservation. The 3M™ E-A-Rfit™ Dual-Ear Validation System accurately quantifies each wearers personal attenuation from inside both ears when wearing earplugs or earmuffs. Our system takes only seconds to measure across 7 standard frequencies and gives a simple pass or fail rating for each employee's personal attenuation rating (PAR) to facilitate training on the importance of fit.

- Gives fast, clear, accurate fit testing of your hearing protection as quantified scientific data
- Personal attenuation rating (PAR) is first step in fit testing and hearing conservation programme
- Measures sound levels inside and outside of the earplug in only 5 seconds

Protective Communications

3M™ PELTOR™ Communication Solutions

The Sound Solution

First-class communication and hearing protection! There was a time when wearing hearing protectors meant being isolated and out of contact. Those days are over. Today, 3M™ PELTOR™ offers first-class communication solutions that not only make your working day safer and more efficient, but also much nicer!

3M™ PELTOR™ products are developed for all environments where high safety must be combined with communication. Industrial environments, construction sites, agriculture and forestry are a few examples. We have developed several models to ensure there's a 3M™ PELTOR™ Headset for every situation. Headband models for all-round use, and models with helmet attachments for people who wear safety helmets at work. To ensure easy use of our products and good functions for all environments we use advance technology such as Level Dependent technology and Bluetooth®.

This pricelist mainly focuses on general industry communication solutions, but 3M also offers specialised products for e.g. military or hunting and shooting. Please contact your local 3M representative if you want to learn more about these industries and products.

Oil and gas

Mining

Hunting and sport shooting

Airport ground handling

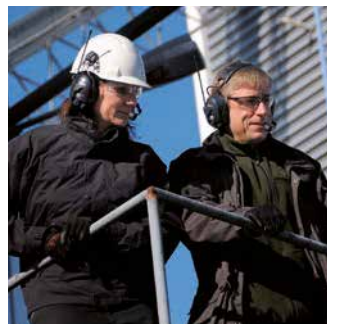

Military and law enforcement

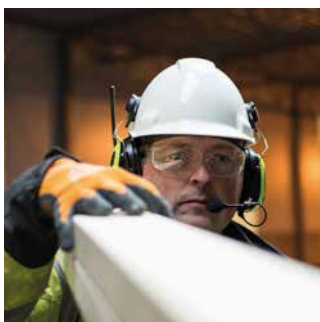

Energy and utilities

Transportation

Industry

Construction

Communicate at distance and boost your productivity

The importance of wearing hearing protection 100% of time exposed

100% usage
Gives the expected protection.

99% usage
Just five minutes of carelessness per day significantly reduces the effect of the hearing protector.

90% usage
Virtually no protection.

Safety

To be effective, a hearing protector should be used 100% of the time in noisy environments. Even taking it off for a short time dramatically reduces its effectiveness and greatly increases the risk of hearing damage. The 3M™ PELTOR™ Communication Solutions encourage longer use because the wearer feels less isolated and can communicate with others more easily.

Function symbols

To help you to understand the functionality of our key communication solutions we have developed a small comparison chart with the following symbols.

Hearing protection with level-dependent function for ambient listening

Hearing protection that features Bluetooth® technology, for wireless connection to mobile phone, or communication radio

Hearing protection with built-in two-way radio

Hearing protection with built-in FM radio receiver

Hearing protection with external audio input

Hearing protection for communication with external two-way radio

Find the headset with the right mix of features and value for you or your customer!

3M™ PELTOR™ ProTac™ III Headsets

3M™ PELTOR™ ProTac™ III Headset with level-dependent function for ambient listening helps you focus on your work and communicate with colleagues in noisy environments, without removing the hearing protection. Stereo feedback will allow you to hear and better determine direction of alarms, warning cries, backing vehicles and so on. Headset unit has a rugged design with dual shells. The electronics are protected from moisture and sweat, from both the inside and the outside. Smart technology, practical design and user friendly functions will help you weather rough days in the field.

- Hearing protector helps protect against harmful noise, whilst allowing ambient sounds to be heard
- Built-in level-dependent function allows the wearer to hear ambient sounds, such as conversations, machine sounds and warning signals
- 3.5 mm stereo jack to connect to your mobile phone or two-way radio to hear the call right in your ear

**3M™ SecureFit™ Safety Helmet
X5000 and X5500 Series**

**Comfort
without
compromise.**

When you work at height or on the ground, it's just another day on the job – and we've got a safety helmet to meet the demands of it.

And when it comes to safety, 3M believes the bar can never be high enough. That's why we're proud to introduce the 3M™ SecureFit™ Safety Helmet.

3M™ SecureFit™ Safety Helmet X5000 Series

3M™ SecureFit™ Safety Helmet, X5000 Series, provides secure, comfortable and adjustable head protection for workers in a variety of situations. Our helmets feature six different settings to adjust positions and 4-point chin strap selector systems to switch between EN397 (industrial safety helmets) or EN12492 (helmets for mountaineers) certification standards. X5000 Series safety helmets are vented, brimless and have 3M™ UVicator™ Sensors that indicate levels of exposure to damaging ultraviolet (UV) light. They have easily-adjustable, 6-point ratchet suspension systems which feature the exclusive 3M™ Pressure Diffusion Technology. They're available in a variety of colours with reflective options available.

- Secure, comfortable head protection for working at heights and other hazardous industrial jobs
- Suspension system incorporates exclusive patented 3M™ Pressure Diffusion Technology
- 4-point chin strap selector system unique to 3M makes it possible to switch between EN 12492 (Mountaineering helmets) and EN 397 (Industrial safety helmets) standards

3M™ SecureFit™ Safety Helmet X5500 Series

3M™ SecureFit™ Safety Helmet X5500 Series provides secure, comfortable and adjustable head protection for workers in a variety of situations. Our helmets feature adjustable positioning and easy-turning, 4-point ratchet suspension systems that features the exclusive 3M™ Pressure Diffusion Technology. X5500 Series safety helmets have 3M™ UVicator™ Sensors that indicates damaging levels of ultraviolet (UV) light. They meet the EN397 standard for general industrial use and are available in a variety of colours with or without vents.

- Secure, comfortable head protection against small falling objects and for general industrial use
- Suspension system incorporates exclusive patented 3M™ Pressure Diffusion Technology
- 4-point ratchet suspension allows wearer to customise height and fit with multiple levels of vertical adjustment

3M™ Hard Hat G3000 Series

3M™ Series G3000 hard hat has been designed in close collaboration with industrial and forestry workers. It is intended for use in harsh environments with tough demands for effective protection, excellent ventilation and a maximum field of vision. The slim design means that falling objects slide off easily and do not dislodge the helmet from its position. Softly rounded design, without any sharp or protruding components, the extremely comfortable lining and the simple adjustment of the neck strap make the G3000 unique.

- Hard hat designed for use in harsh environments, with excellent ventilation and a good field of vision
- 3M™ Uvicator™ sensor disc tells you when your hard hat has been over exposed to UV-radiation and it's time to replace it
- Softly rounded design helps avoid parts snagging on cables or branches

Head & Face Protection

3M™ Hard Hat G3000 Series

3M™ Series G3000 hard hat has been designed in close collaboration with industrial and forestry workers. It is intended for use in harsh environments with tough demands for effective protection, excellent ventilation and a maximum field of vision. The slim design means that falling objects slide off easily and do not dislodge the helmet from its position. Softly rounded design, without any sharp or protruding components, the extremely comfortable lining and the simple adjustment of the neck strap make the G3000 unique.

- Hard hat designed for use in harsh environments, with excellent ventilation and a good field of vision
- 3M™ Uvicator™ sensor disc tells you when your hard hat has been over exposed to UV-radiation and it's time to replace it
- Softly rounded design helps avoid parts snagging on cables or branches

Head & Face Protection

3M™ Elevated Temperature Hard Hat Series G3501 Series

Temperature extremes, metal sparks and splashes – that's the job. And it's a tough environment to work in. 3M™ High Heat Helmet Series G3501 is designed to offer high levels of protection for the toughest of applications. The helmet is also the platform for a range of hearing, eye and face protection products that are designed to withstand the metal working environments without compromising compatibility, comfort or easy of use. Available in six colours, with pinlock or ratchet suspension.

- Lightweight high heat hard hat compatible with 3M eye, face and hearing protection
- Leather sweatband for improved comfort
- Head harness can be rotated 180° for better visibility when working in confined spaces

3M™ GoggleGear™ Safety Goggles 2890 Series

3M™ GoggleGear™ Safety Goggles 2890 Series are high-wrap safety goggles available with a superior anti-scratch and anti-fog coatings for increased durability and vision. Our goggles feature a modern, slim design and a wide, nylon elastic strap for easy adjustability.

- Large profile 3M™ GoggleGear™ Safety Goggles range, with enough space to fit over most prescription glasses
- Polycarbonate lens options available for impact resistance and acetate lens options available for improved chemical resistance
- Indirect ventilation versions available to protect against liquid droplets and large dust particles and sealed ventilation versions available to protect against small dust particles and gas protection

2) With 3M™ Safety Helmet H-701.

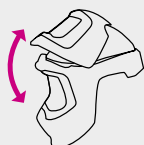

① Exhaust vents
– exhaled air is
channeled out via
side vents.

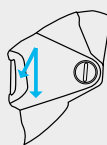

② Side windows
– shade 5 filters that
widen your field of
vision.

③ High-comfort
Speedglas headband
with smooth ratchet for
precise tightening.

④ Big, curved 17×10 cm
clear protective visor,
increasing your vision.

⑤ Adjust the airflow to
your face or your visor,
and the airflow coming
from the top or side
outlets – all without
lifting your helmet.

⑥ Curved ADF
follows the curvature
of your head for
wider total field of
view in a slim helmet.

Welding Helmets

3M™ Speedglas™ Welding Helmet G5-02

3M™ Speedglas™ Welding Helmet G5-02 with curved glass Auto-Darkening Lens. Thanks to the improved optics, the 3M™ Speedglas™ Curved Welding Lens G5-02 allows you to more readily recognize colors, using the 3M™ Speedglas™ Natural Color Technology.

- Our largest Auto-Darkening Lens field of view ever (150×76 mm), utilizing the 3M™ Speedglas™ Curved Glass Technology
- Bluetooth connectivity with app management
- Great clarity before, during and after welding, with our 3M™ Speedglas™ Natural Color Technology

Product ID	Part Number	Product	MOQ	OU
7100205306	621120	3M™ Speedglas™ Welding Helmet G5-02 with Curved Welding Filter, Headband, Cleaning Wipe & Bag, 621120		Each

3M™ Speedglas™ Welding Helmets 9100 FX Series

The 3M™ Speedglas™ 9100 FX Welding Helmet features a flip-up Auto-Darkening Lens design. It incorporates a secondary clear faceshield that's ideal for grinding and set-up work, while the available Auto-Darkening Lens helps protect against the intense light of MIG, TIG, and stick applications. A highly adjustable head suspension system allows the helmet to comfortably fit many different head sizes and shapes, while side windows in the welding helmet give each welder a wider viewing field to see more of their work area.

- Flip-up function allows workers to switch between clear visor and available Auto-Darkening Lens
- 3M™ Speedglas™ Auto-Darkening Lenses provide good contrast and high optical quality
- Shade 5 side windows allows peripheral vision

Welding Safety

3M™ Speedglas™ Welding Helmets 100 Series

3M™ Speedglas™ 100 Series Welding Helmet helps protect welders from flying sparks and airborne debris, and the Auto-Darkening Lens helps keep the eyes safe from the intense light of MIG, TIG, and stick welding while offering an accurate view of the workspace, before during and after the weld. With an optional hard-hat adapter, this helmet is a great choice for welders starting off their careers, tradesmen, and DIYers.

- Welding helmet with optional safety helmet adapter
- Great choice for welders starting off their careers, tradesmen, and DIYers
- Auto-Darkening Lens with five adjustable dark shades 8–12 (not applicable to 3M Speedglas 100 Passive Welding Helmet)

Welding Safety

3M™ Welding Helmets 10 Series

3M™ Speedglas™ Welding Helmet 10 has an auto-darkening 10 V filter and is ideal for Stick and MIG/MAG welding processes. Our welding helmet offers basic functions in a robust yet lightweight design, weighing only 390 grams (including welding filter). It has user-selectable dark shades 10, 11 or 12, as well as two levels of arc sensitivity (switching light to dark state).

- Basic welding helmet with a robust, industrial design
- Light weight – only 390 grams (including auto-darkening welding filter)
- Includes the three most commonly used dark shades (shades 10-12) and a light shade 3

Product ID	Part Number	Product	MOQ	OU
7100166710	101101	3M™ Welding Helmets 10V, 101101		Each

3M™ Welding Helmets 10 QR Series

3M™ Welding Helmet 10-QR Series quickly attaches or detaches from your safety helmet. It's optimised for our 3M™ Safety Helmet H-701, but also compatible with many of the industry's most popular safety helmets.

- Basic welding helmet in a robust, industrial design
- Optimised for the 3M™ Safety Helmet H-701, but compatible with many of the industry's most popular safety helmets
- Quick-release (QR) rail lets you easily detach the welding visor from your safety helmet remains while doing non-welding tasks

Product ID	Part Number	Product	MOQ	OU
7100166719		3M™ Welding Helmets 10 QR, 3M™ Welding Filter 10V and 3M™ Safety Helmet H-701, 101103		Each

3M™ Speedglas™ Welding Helmets SL Series

3M™ Speedglas™ Welding Helmet SL has a narrow design that's 25 % lighter than any other Speedglas model. Our welding helmet is suitable for quick welding tasks with a motion sensor that automatically turns on the Auto-Darkening Lens when you pick up the helmet.

- Appropriate for most arc welding processes, such as MMA, MIG/MAG, TIG and plasma welding. Not suitable for grinding
- Welders working in areas with overhead hazards can now benefit from the safety helmet adapter for 3M™ Speedglas™ Welding Helmet SL
- Weighs a total of just 375g – including the Auto-Darkening Lens

Product ID	Part Number	Product	MOQ	OU
7000000208	701120	3M™ Speedglas™ Welding Helmets SL Series, with Auto Darkening Filter, 701120		Each

Welding Safety

Respiratory Welding Helmets

3M™ Speedglas™ Heavy-Duty Welding Helmet G5-01

3M™ Speedglas™ Heavy Duty Welding Helmet, G5-01 is specifically designed for the heavy duty welder. The helmets flip up functionality allows you to seamlessly switch between welding and grinding tasks while maintaining powered air respiratory protection.

- Available 3M™ Speedglas™ Welding Lens G5-01TW offers variable dark shades 5, 8-13 and tack welding comfort mode and G5-01VC offers variable dark shades 5, 8-14 plus Variable Color Technology
- The big (104 × 170 mm), clear protective visor is curved, with excellent views up, down and peripherally
- For more control over your comfort, the innovative G5-01 helmet airflow optimization system lets you direct the airflow to either your face, visor or somewhere in-between

3M™ Speedglas™ Welding Helmets 9100 FX Air Series

The 3M™ Speedglas™ 9100 FX Air Welding Helmet features a flip-up Auto-Darkening Lens design. It incorporates a secondary clear faceshield that's ideal for grinding and set-up work, while the available Auto-Darkening Lens helps protect against the intense light of MIG, TIG, and stick applications. A highly adjustable head suspension system allows the helmet to comfortably fit many different head sizes and shapes, while side windows in the welding helmet give each welder a wider viewing field to see more of their work area. Combines with 3M™ Adflo™ Powered Air Respirator for respiratory protection.

- Combined face, eye and powered air respiratory protection for welding applications
- Wide protective visor is curved, providing excellent views up, down and peripherally
- Side windows (shade 5) can help widen the field of vision

Product ID	Part Number	Product	MOQ	OU

3M™ Adflo™ Powered Air Respirator System

For effective protection against a range of particulates and gases encountered in the welding process, use 3M™ Adflo™ Powered Air Respirator. The Adflo™ respirator connects directly with any Speedglas™ Series respiratory welding helmet and can protect users against both particles and gases depending on the filter used.

- Can protect you against particles and gases, all in one system, depending on filter used
- Nominal protection Factor up to 500 (TH3) in combination with Speedglas welding helmets
- Connects directly with any Speedglas Series respiratory welding helmet

3M™ Protective Coverall 4510

3M™ Protective Coverall 4510 offers economic protection against infective agents, certain hazardous dusts and limited liquid splashes. Our PE laminate includes micro pores which allow heat and moisture to evaporate from the skin and out through the suit offering a light and comfortable yet protective solution.

- Type 5/6 Coverall designed to offer cost effective protection against hazardous dusts and limited liquid splashes.
- Protection against EN 14126 Biological agents
- Made of a soft lightweight non-woven with microporous laminate for splash protection, strength and breathability

Apparel & Workwear

3M™ Protective Coverall 4515

3M™ Protective Coverall 4515 is a strong 50gsm SMS coverall with superb breathability and comfort meaning it can be worn comfortably for long periods of time and help productivity. CE certified it protects against toxic dusts Type 5, liquid splashes Type 6 and nuclear particles to EN 1073-2. An economic solution, it is available in a variety of colours to assist in identification and zoning.

- Type 5/6 Coverall designed to offer cost effective protection against hazardous dusts such as asbestos fibre
- Made from highly breathable SMS non-woven for effective release of body heat and moisture and reduced heat stress
- Soft and strong 50gsm SMS for strong performance

3M™ Protective Coverall 4535

3M™ Protective Coverall 4535 provides a superb balance of comfort and protection. The front is made from a soft non-woven robust 60gsm material, with a microporous laminate for enhanced splash protection, combined with a SMMMS back panel for increased breathability. The 3M Protective Coverall 4535 acts as a barrier to limited liquid splashes and hazardous particles.

- Type 5/6 Coverall made from extremely soft, lightweight, yet durable fabric which provides a good barrier to hazardous particles and limited liquid splash
- Special breathable panel hood design combined with large breathable back panels reduce the risk of heat stress in hot environments
- 2-way zip and storm flap with elasticated apertures reduces the risk of skin exposure
