

Personal Protection Equipment from ESAB

A full line of personal protection equipment 2015/1 catalogue.

World

Since 1904, ESAB has been both a pioneer and leader in welding and cutting development technology. Today ESAB combines world leadership with global applications expertise.

leader

in welding and cutting technology and systems

With over 100 years of experience, and a presence in over 80 countries worldwide, ESAB is probably the most recognised brand in welding and cutting with a product portfolio, which includes:

Standard Welding and Cutting Equipment

Automatic Equipment

Automated Cutting Equipment

Welding Consumables

Personal Protection Equipment (PPE)

Welding Accessories

By continuously improving and developing our products and manufacturing processes, we meet the challenges of technological advance in every sector and market we operate in. Delivering quality products and services remains at the heart of everything we do across all our global sales and product operations.

Personal Protection

ESAB offer a comprehensive range of Personal Protection Equipment, covering everything from head to foot, for both welding and cutting and general engineering applications. All ESAB products conform to all relevant EU legislation and standards.

As Health and Safety Standards improve year on year, so does ESAB's commitment to providing a product portfolio capable of meeting the ever increasing demands of the markets we serve. As you would expect from a leading supplier of welding and cutting solutions, the ESAB product range is second to none for quality and reliability.

Helmets, Masks & Screens

Aristo® Tech HD

The Aristo® Tech HD stands for "High Definition" and the helmet has been designed for the professional welder who wants the best in protection and performance. The new light weight shell and ergonomically designed headgear offers maximum comfort even when welding for long periods of time. The Aristo® Tech offers the latest in digital lens technology, with large viewing area and internal LCD display, providing the welder full control to adjust shade level, sensitivity and delay settings with precision for any welding application.

See the weld in HD!

Lens Technology

- Variable 5-13 Digital control for adjustment of shade level, sensitivity and delay
- Optical Class 1/1/1/1
- 100 x 60 mm viewing area
- Grind mode activated at lowest sensitivity

Comfort Head Gear

- Ergonomic design head gear
- Instant longitudinal adjustment
- New "TIG+" mode - Low amp welding function

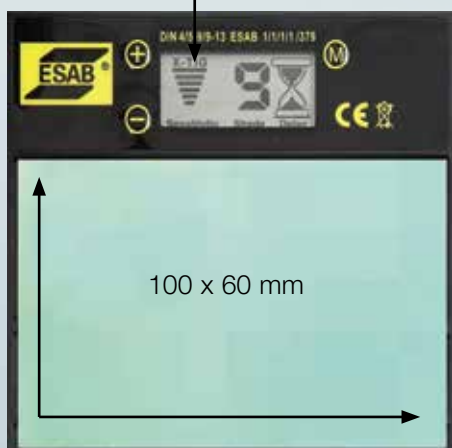

Shell

- New matte/carbon black finish
- Conforms to:
CE, ANSI, AS/NZS, CSA
- EN175-B Impact Shell

Helmet weighs only 490g

Maximum sensitivity setting engages the TIG+ mode

"TIG+" Functionality.
Exceptional performance during low amp welding

ESABs latest integrated Circuit LENS Technology, offers an internal LCD display with outstanding reliability, suitable for all manual welding processes, including plasma cutting.

- Digital Display Screen
- Lens Delay Control
- Visible Shade & Sensitivity Settings

Designed for use with a wide range of welding applications

Helmets, Masks & Screens

Aristo® Tech HD

FRONT COVER LENS

The Aristo® Tech HD front cover lens offers the ultimate in Protection. This lens has been coated for increased scratch and heat resistance. Using a specialised injection moulding process, the lens is pre moulded into a convex curve with an optical class 1. This means that the threat of duplicate ghost Arcs visible through the cartridge is eliminated.

HEAD GEAR

- Robust head gear
- Possibility to move the helmet closer or further away from the face
- Comfortable and replaceable sweat band
- Angled front head band

Aristo® Tech HD 5-13

Aristo® Tech HD 5-13 is an active welding helmet for professional MIG/MAG, TIG and MMA welding from low to high current values incl. plasma cutting and grinding. Advanced settings such as grinding mode (DIN 4), delay and sensitivity. Quick Set™ facilitates adjustment of shade level and sensitivity. Just push the button during ongoing welding to increase/decrease the set value. For greater clarity, the set value is displayed on the cassette's digital display. High optical class 1/1/1/1. Weight 490g.

Helmets, Masks & Screens

New-Tech™ ADC Plus

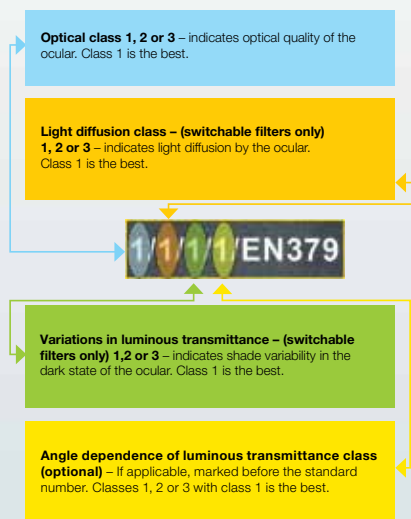

The ADC plus is the second phase technology from the original New-Tech™ ADC range of welding helmets from ESAB, a market-leading supplier of welding related personal protection equipment. As a result of extensive research into typical application and user comfort requirements, the ESAB New-Tech™ ADC Plus cartridge offers new features, which make these new helmets unique.

The new 'Angular Dependence Compensation'

Plus (ADC) ensures that the selected shade covers the full width and height of the LCD screen, whilst the addition of the Plus offers improved colour definition and contrast throughout the cartridge.

- Increased colour definition
- Lighter contrast
- External adjustable shade
- External adjustable sensitivity
- External delay adjustment
- Superb optical quality

1/1/1/1 EN379

There are 3 helmets in the New-Tech™ ADC Plus range all offering superb performance and the ultimate in operator protection and comfort.

New-Tech™ 9-13 ADC Plus

New-Tech™ 6-13 ADC Plus

New-Tech™ 6-13 XL ADC Plus

Helmets, Masks & Screens

New-Tech™ ADC Plus Difference

XL VIEWING AREA

New-Tech™ 6-13 XL ADC Plus helmet offers an increased cartridge viewing area of 96 x 68.5mm.

STANDARD ADC PLUS SIZE

XL ADC PLUS SIZE

OPEN STATE

ADC Plus Colour Definition

The ADC Plus range offers superior colour definition in both the open and activated state, allowing the welder to better see the LED displays on machines and equipment, whilst also identifying heat definition on the actual weld.

STANDARD NON ADC PLUS CARTRIDGE

ADC PLUS CARTRIDGE

CLOSED STATE

ADC Plus Optical Quality

The ADC Plus cartridge boasts a 1/1/1/1 optical quality rating, which is the best on the market. This means that an even shade level is seen across the full height and width of the viewing area.

The benefits – an increased shaded area that covers the height and width of the cartridge, whilst reducing bright visible light.

STANDARD NON ADC PLUS CARTRIDGE

ADC PLUS CARTRIDGE

New-Tech™ ADC Plus

New-Tech™ 6-13 ADC XL ADC Plus

The New-Tech™ 6-13 XL can be used for almost any application. The shade level can be adjusted from DIN 6 to DIN 13, making this helmet very versatile. All settings are made from the outside of the helmet. The helmet features a grinding mode, where the cartridge can be switched off for grinding, there is also a sensitivity and delay function. The New-Tech™ 6-13 XL is equipped with ADC technology which will ensure a solid shade level even when viewing the lens at an angle, i.e. positional welding. Conforms to EN 175 and EN 379.

Helmets, Masks & Screens

Warrior™ Tech

The WARRIOR™ Tech helmet has been designed to meet the needs of a variety of welders, providing a high tech lightweight shell to protect from heat, sparks and spatter, The welding lens gives a high clarity of view, resulting in an excellent optical quality utilising the latest ADF technology.

The WARRIOR™ Tech helmet provides ideal functionality, performance and comfort to the occasional welder, maintenance and construction workers through to the professional welder.

- Variable shade level DIN 9-13
- High optical class 1/2/1/2 according to EN 379
- Large field of view 98 x 48mm
- Lightweight – only 520g
- 4 sensors ensure correct read off
- Robust head harness – easy to adjust
- Ergonomic sweat band – increased comfort
- Variable sensitivity with internal knob
- Variable delay with internal knob
- Magnifying glass available as an accessory

Helmet weighs only 520g

ENHANCED PERFORMANCE

- Four Arc sensors for higher response and wider coverage
- Optimal performance for most fabrication and out-of-position welding

LARGE VIEWING AREA

- 98mm x 48mm (3.85" x 1.88")
- Giving a wider field of vision increasing spatial awareness
- 1/2/1/2 – Optical Class 9–13 shade level

SENSITIVITY CONTROL

- An adaptable feature useful when welding low amperages (TIG) for better reaction to darker Arc light

DELAY CONTROL

- Enabling the welder to set how long the lens stays dark after welding arc stops
- Short delay helps get the job done faster during tack welding, whilst longer delay is useful for high amperage welding

Helmets, Masks & Screens

Warrior™ Tech

Available with dioptre configurations as standard

Warrior™ Tech 9-13

Warrior™ Tech 9-13 is an automatically dimming welding helmet for MIG/MAG, MMA and TIG welding (>20 Amp) with infinitely variable shade levels from DIN 9-13. The external adjustment knob makes it easy for the welder to adjust the shade level. Sensitivity and delay can be adjusted according to requirements. The Warrior™ Tech 9-13 helmet is available in two colours; classic black or tough ESAB yellow. Lightweight, only 520g. Built-in battery charged by solar cells. The welding helmet is recommended for MIG/MAG, TIG and MMA welding (>20 Amp). High optical quality 1-2-1-2. CE approved according to both EN 379 and EN 175.

Warrior™ Tech 9-13 with Hard Hat

Warrior™ Tech offers the welder the unique possibility of removing the hard hat with one hand movement. This means optimum safety and the best ergonomics for the welder – the helmet is used when required, while the neck is not put under strain unnecessarily. The welding helmet's usual head harness is replaced with the unique helmet adapter (0700 001 005), which secures the hard hat in place. The hard hat is made of ABS and only weighs 300g. Available in six different colours. Supplied with sweat band. CE approved according to EN 397. Helmet mounted hearing protection available as an option.

Albatross Welding Helmets

The Albatross range consists of several types of lightweight welding helmets with flip-up visor. Newly introduced to the range, Albatross 4000X 9-13 also has an automatically dimmed cassette. Albatross welding helmets have maximum flexibility and can be combined with hard hats, hearing protection and fresh air units. The helmet shell is made of extremely lightweight and resistant material, giving a long service life and excellent comfort. The ESAB Pro head harness is very easy to adjust for a perfect fit.

Albatross 1000

Albatross 1000 has a flip-up visor for the welding glass, 60 x 110mm or 90 x 110mm. The large clear plastic lens protects the face when the visor is flipped up. Welding glass DIN 10 and protective glass included at delivery. Weight 400g (60 x 110) resp 420g (90 x 110). CE approved according to EN 175.

Albatross 1000 60 x 110 standard	0000 595 200
Albatross 1000 90 x 110 standard	0349 502 204

Albatross 4000X

Albatross 4000X is a combined welding and grinding helmet with flip-up visor. The large plastic lens gives the welder an unobstructed field of view when the visor is flipped up. The helmets are rated B in the impact resistance classification, which means they are approved for grinding. Welding glass DIN 10 and protective glass included at delivery. Weight 580g. CE approved according to EN 175 and EN 166, class B.

Albatross 4000X standard	0700 000 315
--------------------------	---------------------

Albatross 4000X 9-13

Albatross 4000X 9-13 is a combined welding and grinding helmet with automatically dimming cassette, shade levels DIN 9-13, and with flip-up visor. The large plastic lens gives the welder an unobstructed field of view when the visor is flipped up. The helmets are rated B in the impact resistance classification, which means they are approved for grinding. Weight 615g. CE approved according to EN 379, EN 175 and EN 166, class B.

Globe-Arc – A Multi Process Helmet

The Globe-Arc helmet has been designed to provide the ideal protection for all kinds of metal working. The inner lens in combination with the outer lens provide full protection against IR, UV and visible light making it suitable for welding. The inner lenses are available in a number of different shades; DIN 2, DIN 3 and DIN 5. The helmet can therefore also be used for grinding, gas cutting, gas welding and plasma cutting.

Helmets, Masks & Screens

Globe-Arc – Combinations

Globe-Arc Welding and Grinding Helmet

The Globe-Arc is a unique design in flip front welding and grinding helmets. The visor provides effective protection from UV and IR radiation when the visor is both open and closed, and is available in different shade levels. The helmet is equipped with a strong and comfortable head gear.

Globe-Arc Shade 7 (Inner shade 3, outer shade 5)	0700 000 308

Concept hard hat available in six colours!

Globe-Arc Welding and Grinding Helmet with Hard Hat

Globe-Arc offers the welder the unique possibility of removing the hard hat with one hand movement. This means optimum safety and the best ergonomics for the welder – the helmet is used when required, while the neck is not put under strain unnecessarily. The welding helmet’s usual head harness is replaced with the unique helmet adapter, which secures the hard hat in place. The hard hat is made of ABS and only weighs 300g. Available in six different colours. Supplied with sweat band. CE approved according to EN 397.

Hand Screen Delta

Welding screen that protects the face as well as the hand. The window size is 90 x 110mm. Welding glass not included.

Hand Screen Delta DIN 10

0700 000 394

Includes DIN 10 glass

Hand Screen SF12

Deep shell fibre glass screen. Weighs 525g. Lens aperture 108 x 83mm (4 1/4" x 3 1/4").

Hand Screen SF12

0700 654 890

Murex SF12

0700 000 349

Does not include welding lens

Hand screen SF2

Flat fronted fibreglass hand screen. Weight 450g. Lens aperture 108 x 83mm (4 1/4" x 3 1/4").

Hand Screen SF2

0700 655 002

Does not include welding lens

Filter & Spatter Lenses

Filter Lenses

Traditional glass filter lenses of excellent UV and IR protection and thermal stability. Solid glass lenses are not robust and must be used with a polycarbonate backing lens and a glass or plastic cover lens.

Accessories for all ESAB's Welding Helmets

Chest Protector and Head/Neck Protector for Welding Helmet

Chest protector and Head/Neck protector are recommended as supplementary protection for ESAB's welding helmets. Both are made of leather to give the best durability against welding spatter. The chest protector functions as a bib and gives extra protection to the throat and chest. The chest protector has an integrated rubber profile, which is threaded on to the underside of the welding helmet. The Head and Neck protector protects that part of the head and neck not protected by the welding helmet. The protector has an integrated rubber profile, which is threaded on to the upper side of the welding helmet. Apply a little liquid soap to the rubber profile to facilitate installation.

Leather chest protector for welding helmet	0700 000 062
Leather head and chest protector for welding helmet	0700 000 063

ESAB Easy-Lite

The Easy-Lite is a small but effective light source, that can be easily attached to your welding helmet, hard hat, spectacle or anywhere that additional light is required. The Easy-Lite has also proven to be an excellent tool for adapting to a stainless steel inspection mirror, the bright LED is perfect for highlighting the weld in difficult places where there is insufficient light. The LED is turned on by a simple switch, and the battery has over 50 hours of life.

ESAB Easy-Lite	0700 014 040
----------------	---------------------

Accessories Welding Helmets

Magnifying Lenses

All welding helmets can be equipped with magnifying glass to correct vision when the welder is not wearing glasses.

Magnifying glass is mounted from the inside of the helmet, no adapter is required. Fits New-Tech™, Aristo® Tech, Origo™ Tech and Eye-Tech II.

Magnifying glass +1.0 diopter	0700 000 084
Magnifying glass +1.5 diopter	0700 000 085
Magnifying glass +2.0 diopter	0700 000 086
Magnifying glass +2.5 diopter	0700 000 087

For Warrior™ Tech the magnifying glass is mounted on the inside of the helmet, no adapter is required.

For Albatross 4000X the magnifying glass is clamped on the inside of the helmet and is slightly smaller than the welding glass. A mounting frame is required for Eye-Tech™.

Magnifying glass +1.0 diopter	0367 951 001

Helmet Spacer Kit

The ESAB helmet spacer kit has been designed to increase the width of the shell from the headgear allowing a pair of Ear defenders to be worn under the helmet.

Helmet Spacer Kit	0700 001 004
-------------------	---------------------

ESAB Mask Spray

The ESAB mask spray should be applied to the cover lenses in a helmet to keep them mist free and clean. 300ml.

Mask Spray 300ml Pk 6	0700 013 026
-----------------------	---------------------

Hard Hats & Hearing Protection

ESAB's new hard hat hearing adapter makes it possible to combine all ESAB's welding helmets with the most common protective helmets. Hearing protectors, either a traditional model or one with a radio, can be added to all combinations.

This system enables a much more comprehensive choice of welding helmets, as you now can use the same basic model of the helmet by removing the headband and replacing it with the helmet adapter. There is no need for a separate helmet model of a welding mask. The welding mask can be quickly removed from the helmet by lifting the hearing protectors to top position and pulling the helmet from the adapter. Correspondingly, the mask can be locked to the helmet by lowering the hearing protectors to lowest position.

After welding you can quickly remove the mask from the helmet, so working can continue with the same helmet and hearing protectors still on. No tools are needed for the removal.

Hearing protection, standard or with FM-radio, is easily mounted on the Universal helmet adapter.

Universal helmet adapter makes it possible to combine a hard hat with any ESAB welding helmet.

Hearing protection standard

- Narrow profile

Hearing protection with radio

- Li-Ion battery with up to 80 hours operation
- Automatic channel seek
- Memory for last channel selection
- Narrow profile
- Digital setting, selected channel always correctly set
- DX function and searching for local channels
- Short antenna

Hard Hats & Hearing Protection

Lock positions – with/without hearing protection

When welding is complete the welding helmet can be removed by turning the black helmet adapter, so that the arrow points upwards. If hearing protection is used it is even easier, turn the hearing protectors on the welding helmet upwards and the helmet adapter is automatically turned to the correct position. Then pull the welding helmet forward, and it comes free from the hard hat. No tools are required and the hard hat never needs to be removed to remove the welding helmet.

Fixed in folded up position

When the welding helmet is raised to the maximum folded up position it is automatically fixed. By “nodding” the head the welding helmet falls into place again. Just how welders want it!

Combination possibilities

Select any standard ESAB welding helmet Supplement with the Universal kit for the hard hat that you use. Supplement with hearing protection, standard or with FM radio as necessary. Put together – ready!

Hard hat Peltor G3000N and G22c

Hard hat Peltor G3000N is specially developed for Albatross welding helmets. The hard hat is made of UV stabilised ABS and only weighs 340g. There are ventilation holes at the top for the best ventilation of the whole helmet. Mounting for easy installation of hearing protection. Hard hat G22c fits Euromask welding helmets. CE approved according to EN 397.

*) helmet mounting fits 3M/Peltor hard hats G22c, G2000 and G3000N.

Respiratory Equipment

Why choose ESAB Powered Air Purifying Respirator (PAPR) systems?

The welding fume generated from the open arc welding process contains airborne particles released from the consumables and the material being welded. More than 90% of the fume arises from vaporisation of the consumable electrode, wire or rod as material is transferred across the arc or flame. Welding fume particles can be hazardous as they can penetrate the innermost parts of the lungs.

Long term exposure to welding fumes may affect the body's respiratory system, for example through substance inhalation and release into the blood system which can result in long term health problems.

ESAB recommends the use of powered air purifying respirators (PAPR) in combination with ESAB's welding helmet. PAPR units operate by filtering the air through a battery powered unit, which is then supplied into the breathing zone inside the helmet.

ESAB PAPR systems are fitted with a P3 main filter which, if used correctly, can filter out up to 99.8%. All ESAB CE certified systems fully comply to EN 12941 achieving a minimum level of THP2 and highest level of THP3.

The PAPR should always be used, cleaned, inspected and maintained in accordance with the operating and maintenance instructions provided. A risk assessment should be carried before use to ensure the PAPR system is suitable for the risks involved, the conditions at the place where exposure to the risk may occur, and the period for which it is worn, taking into account the state of health of the person who may wear the equipment, the work to be undertaken and the work environment.

Respiratory Equipment

Choice of Filter

Prefilter

The air first passes through the fresh air unit prefilter, which filters larger particles, which extends the life of the main filter and reduces the running cost of the fan. Prefilter with integrated carbon filter reduces unwanted odours.

Main filter (Particle filter)

ESAB's fresh air fans are always supplied with a main filter of the P3 type, which gives the highest filtration efficiency – 99.8%. The main filter filters out damaging particles in the smoke, both solids and vapour borne. This means that particles containing aluminium, barium, cobalt, chrome, copper, manganese and nickel are caught by the main filter. Particle filter P2 with integrated carbon filter reduces unwanted odours. After passing through the prefilter the remaining dangerous filters are filtered by the main filter. It is recommended that welders who want to minimise unwanted odours use: Prefilter with integrated carbon filter + Particle filter P2 with integrated carbon filter. The main filter consists of a very sensitive filter element that will be damaged if cleaned using compressed air.

ESAB recommends that welders who want to reduce unwanted odours but still want maximum protection from dangerous particles use: Prefilter with integrated carbon filter + Particle filter P3.

Prefilter

Main filter

Prefilter

Prefilter filters larger particles which extends the life of the main filter and reduces the running cost of the fan. Standard on delivery.

Prefilter, pack of 5
0700 002 023

Particle filter P3

ESAB's fresh air fans are always supplied with a main filter of the P3 type, which gives the highest filtration efficiency – 99.8%. The particle filter filters out damaging particles in the smoke, both solids and vapour borne. Approved according to EN 12941 classification THP3/TH3PSL.

Particle filter P3, pack of 1
0700 002 024

Prefilter with carbon filter

Prefilter with integrated carbon filter filters out larger particles and reduces unwanted odours.

Prefilter with carbon filter, pack of 10
0700 002 040

Particle filter P2 with carbon filter

Particle filter P2 with integrated carbon filter is recommended for welders who wish to avoid unwanted odours. This particle filter has the next highest filtration efficiency – 98.0%. The particle filter filters out damaging particles in the smoke, both solids and vapour borne. Approved according to EN 12941, classification THP2/TH2PSL.

Respiratory Equipment

ESAB Aristo® Air

The Aristo® Air PAPR (Powered Air Purifying Respirator) system combined with the Aristo® Tech helmet, offers heavy duty protection from welding fume and dust when welding, gouging & grinding. The unit features the latest in PCB Board technology, allowing the welder to adjust the air flow from 170 L/min to 210 L/min to suit the environment and application. This is highlighted by an LED airflow indicator on top of the unit. The Aristo® Air is equipped with audio & visual blocked filter and low battery alarms, offering extra safety for the welder.

The strong physical construction of the Aristo® Air, makes it extremely robust and suitable for all heavy duty welding applications.

- User adjustable air flow 170/210 L/min
- Li Ion battery pack
(up to 8hr duration @ 210L/min)
- P3 filter and pre-filter
- International intelligent charger
(interchangeable pins)
- Audio/visual blocked filter and low battery alarms
- LED air flow indicator
- Battery charge LED indicator
- Flat push button membrane switch
- Supplied with 'new style' comfort pad

Lightweight at only 1kg

Battery life indicator

Adjustable airflow

Aristo® Air

The Aristo® Air PAPR unit is delivered complete and is ready to use. Contents include: Air unit with air hose and hose cover, battery, intelligent charger, comfort pad and P3 filter.

Aristo® Air Complete

0700 002 174

Respiratory Equipment

ESAB Eco Air

Eco Air is a robust fresh air fan, that gives a stable airflow of 170 litres fresh air/min. Supplied with both prefilter and Particle filter P3 of highest protection class. Carbon filter available as an accessory. Eco Air also has an integrated alarm (audible signal) that warns of low battery level or that the blocked filter needs changing. The battery can be used for up to 8 hours. The intelligent battery charger (IQ) checks that the battery is optimally charged and prevents overheating, which extends the service life of the battery. Only weighs 1170g incl. belt.

- Constant air flow 170 litres fresh air/min
- High quality NiMh battery that lasts for up to 8 hours
- Supplied with Particle filter P3 of highest protection class, together with efficient prefilter
- Intelligent battery charger checks that the battery is optimally charged and prevents overheating
- Integrated alarm (audible signal) warn of blocked filter or low battery level
- Strong construction – can with stand >100kg static load
- Large comfort pad reducing muscle strain

Eco Air

Eco Air is a robust fresh air fan, that gives a stable airflow of 170 litres fresh air/min. Supplied complete with particle filter P3, air hose 850mm with hose sleeve, chargeable NiMh battery, intelligent battery charger and ergonomic belt. CE approved according to EN 12941:2008 for use together with New-Tech™, Aristo® Tech, Origo™ Tech, Albatross 1000/4000X and Warrior™ Tech.

ESAB Compressed Air Filtration Bank

The filter system consists of three filtration units which will remove liquids, solid contaminants, oil vapour and odours from the compressed air supply and provides clean breathing air to the operators.

The filtration bank should be used when a clean air supply is not available. The units are fitted with 1/4" (6.4mm) input hose tail adapter, a 0.5-10 bar adjustable regulator, twin output 'quick-snap' style hose connectors for 1 or 2 operators and a gauge as a guide to output pressure. The filtration bank can be supplied for wall mounting or on a portable frame.

Respiratory Equipment

Filtair Disposable Masks

The ESAB Filtair series has been developed to improve the comfort of disposable respirators whilst maintaining an excellent face fit. Colour coding the range makes identification simple when varying levels of protection may be required. The mesh shell supports the filter media and prevents collapse onto the face and the preformed nose bridge provides comfortable fit eliminating constant adjustment.

The filters use the latest filter technology to promote low breathing resistance and are approved to EN149:2001 (meeting the 120mg load testing).

The Filtair is available as a pre-moulded and a flat version. Depending on the protection level needed and the breathing resistance some models are equipped with a valve. All the masks are fitted with buckle fastening which also allows the wearer to adjust the straps accordingly.

Respiratory Equipment

Filtair Disposable Masks – Moulded

ESAB Filtair Pro 8010

This mask provide P1 protection and is suitable to wear during general dusty duties.

ESAB Filtair Pro P1 'White' Pk 20

0700 002 200

ESAB Filtair Pro 8020V

This mask provide P2 protection and is equipped with a valve to reduce heat and moisture build up inside the respirator. Suitable to wear when sanding painted metals, powder coating and sanding cured resins.

Spectacles, Goggles & Visors

Aristo® Premium Safety Spectacles

ESAB's safety eye wear combines the highest standards of safety and eye protection with excellent features for wearer comfort. This ensures that the eyes are optimally protected during operations. All ESAB spectacles use a Polycarbonate providing protection against impact as well as UV rays.

The Aristo® Spec range of safety spectacles combine a high degree of comfort and protection to the user, whilst offering useful features like Anti Fog and Anti Scratch coating. Available in clear and smoked lens configurations, with the highest optical class. Packed in a Perspex box with hanging slot.

- Hard Coated lens – Longer life with unimpaired vision
- Anti Fog Coated – no steaming up of lens
- Lightweight wrap around – Comfortable and good coverage from all angles
- Optical rating 1 – No distortions / perfect clarity
- Including a neck cord
- Extremely flexible and durable
- Non-slip nose pads
- Conforms to EN 166
- Light weight 23g

Aristo® Clear UV

The clear lens is suitable when working indoors, providing general eye protection.

Aristo® Clear

0700 012 034

Aristo® Smoked UV

The smoked lens is suitable when working in strong ambient light.

Aristo® Smoked

Warrior™ Safety Spectacles

These stylish spectacles are used for drilling, chipping and metalworking. They have a sporty style, soft to the touch, and have a lightweight wrap around, including a neck cord. They are extremely flexible and durable, and are available in four different lens configurations. All lens configurations provide protection against dangerous UV radiation. CE approved according to EN 166-F. There are 12 pairs packed per box.

- Fantastically flexible and durable
- Rubberised sidepieces that hold spectacles in place
- Approved according to EN 166-F
- Scratch resistant lens of the highest optical class
- Anti-slip nose bridge
- Super lightweight—weighs only 24g
- Supplied with neck strap/lanyard
- Supplied in boxes of 12, individually packed and marked with part no., designation and barcode (EAN)

Welding Clothing

Leather Workwear

ESAB's Leather protective range is helping to redefine welder protection, with garments that provide optimal fit, comfort, performance, style & durability, resulting in safer, more productive working environments.

The products include jackets, trousers, sleeves, aprons and gaiters, all ideal for every welding application for the professional welder.

ISO EN 11612
Flame Retardance

ISO EN 11611
level 1 and 2

Welding Jackets

The ESAB Proban/leather jackets are designed for maximum comfort and safety. The sleeves and shoulders are made in durable grade A leather to withstand the exposure to welding spatter. The front and back is made from flame retardant Proban material. The garment feature concealed inner pockets, adjustable sleeves and a stand up collar. Kevlar stitched.

Welding Clothing

Clothing and Workwear

Whatever your welding clothing requirements, ESAB can offer you a high performance range of welding garments suitable for any welding environment. With a great choice of traditional leather or high specification, Phoenix FR® inherently flame retardant fabrics, ESAB's product experts have developed a superior range of multi-risk garments to meet the demands of the welder.

Phoenix FR®

ESAB is proud to introduce the very latest technology in inherent flame retardant garments. In many industries workers face a complex mix of safety hazards, yet most protective fabrics protect from one or two hazards only. For this reason, employers in the past have been forced to compromise on safety. Not any more.

Phoenix FR® is proven to protect from flame, weld spatter, heat and electric arc explosion. Its' unique molecular structure means that the flame-resistant properties are inherent and therefore, permanent. This technology is the result of a four year development programme and ensures that all our Phoenix FR® range exceed the very latest ISO international standards.

Head Protection

Proban Hood

Flame resistant head protection which cover not only the head but also the neck, nape and shoulders.

Proban Hood

0000 593 269

Leather Head and Chest Protection

These two pieces of leather material, offer protection to the head, neck and chest area. They are ideal for welding in areas where all round protection is needed, to protect against sparks, spatter and any other air born particles from the welding environment. They are split into two pieces. One piece is covering the chest area, whilst the other piece is covering the head and neck area at the back of the helmet. They can easily be adapted to the Warrior™ Tech, Aristo® Tech HD and New-Tech™ welding helmets.

Leather Chest Protection

Welding Gloves

Glove EN Standards and Materials

CE labelling – Risk Class – Categorising Personal Protective Equipment (PPE), EU Directive 89/686/EF.

The intention of this directive is to ensure that all PPE sold in Europe corresponds to the relevant EN standards. This will secure a generally identical quality standard throughout Europe. Products that meet the requirements in one or more standards must be branded with the CE logo.

Category 1, Simple Design:

These products protect against minimal risks and can only be used where any risk increases gradually and can be easily identified by the user in advance. The CE labelling consists of only the CE mark.

Category 2, Intermediate Design:

The products are tested and technically approved by an authorised test institute. The institute also examines the manufacturers technical documentation to establish that the product is produced in accordance with the relevant EN standard. The CE labelling consists of the CE mark, the test institute approval number, year of first time approval, pictograms and test performance.

EN 388:2003 – Protection against mechanical damage

Character

a) Abrasion resistance	1 – 4
b) Blade Cut resistance	1 – 5
c) Tear resistance	1 – 4
d) Puncture resistance	1 – 4

EN 407:2004 – Welding gloves Thermal resistance

Character

a) Burning behaviour	1 – 4
b) Contact heat	1 – 4
c) Convective heat	1 – 4
d) Small splashes of molten metal	1 – 4
f) Large splashes of molten metals	1 – 4

EN 420 – general requirements for most protective gloves as

- Product and packaging information and labelling
- Care and maintenance
- Size
- The product itself must present no risk to users (requirements concerning chromium content and pH)
- Storage of the products

Leather quality

Finding the right quality leather to meet the exacting requirements of the welding professional requires experience. ESAB have extensive knowledge and experience with tanning and finishing – important processes that determine the final quality of the leather. It is these processes that give the leather its qualities in relation to strength, softness and flexibility.

The upper skin is called “grain” and the inner skin is called “split” Grain leather is soft, durable, wear resistant and tolerates some water. It can also withstand heat up to 80°C. Split leather is porous and will therefore absorb humidity more easily than grain leather. Its naturally rough surface gives good grip properties. The thickness depends on how the skin is cut and whether it is cut in one or two layers. Without special treatment, split leather can resist heat up to 100°C.

Ox Leather

A wear resistant grain leather which tolerates water. The leather is often thick, which in addition to its wear resistant properties makes it suitable for use in working gloves that must tolerate rough use. It also gives good protection against heat.

Pig Leather

The surface of the leather is relatively porous which makes the breathability of the glove better than most other leathers. Pig leather is also softer.

Goat Leather

Goat leather is the longest lasting leather. Natural lanolin content makes goat leather extremely flexible. It also has very good wear resistance. Strength and flexibility make this leather very suitable for work where good finger feel and dexterity is required.

Welding Gloves

MIG/MAG/MMA

All ESAB gloves are CE approved. The heavy duty welding gauntlets and riggers have been tested and certified by a third party notifying body. The glove is then a Cat. 2 product.

Test against mechanical stress such as abrasion, cut, tear and puncture.

Test for thermal performance such as exposure to an open flame, contact heat, convective heat, radiant heat, small and large splashes of molten metal.

ESAB Curved MIG Glove

These superior new welding gloves from ESAB offer a whole new approach to fit, form and function. Ergonomically designed to fit the natural curve of the hand, offering increased quality & comfort to the wearer. The MIG glove is made from heavy & fine cut leather, and is lined from hand to cuff. With the curved design the glove fits the hand perfectly, and also has a flexible wrist area which reduces friction. With welted seams, kevlar stitching & reinforced thumb, the glove is very strong and offers a very high level of protection to the wearer. EN 12477 and EN 388 Cat 2.

Heavy Duty Black

Our most popular product, made from high performance cow split leather, high dexterity palm and fingers with wing thumb, fully welted fingers and Kevlar stitched. Ideal for areas of high mechanical stress. CE approved to EN12477 and EN388 Cat 2.

Heavy Duty Black

0467 222 007

Heavy Duty EXL

A high quality welding gauntlet made from both cow split and grain leather. The grain leather back offers excellent heat properties while the split leather offers excellent dexterity, durability and comfort. Features fully reinforced three fold thumb, fully welted, Kevlar stitched with grain back. Fully lined inner with FR cotton to cuff and full Jersey lining to palm. CE approved to EN12477 & EN388 Cat 2.

Welding Gloves

Welding Gloves TIG

ESAB Curved TIG Gauntlet

These superior new welding gloves from ESAB offer a whole new approach to fit, form and function. Ergonomically designed to fit the natural curve of the hand, offering increased quality & comfort to the wearer. The TIG glove is made from thin high quality leather, with improved fit for higher dexterity. The glove is highly durable, with welted seams & kevlar stitching. The glove is also extremely light weight, which increases the comfort to the wearer.

Heavy Duty Aluminium 250°C

A high temperature addition to the range. Featuring unique aluminised woven Kevlar back capable of withstanding a radiant heat of up to 1000°C with a heavy duty 1.3mm ceramic fibre supported leather palm capable of Contact palm heat up to 250°C. The glove features wing thumb, fully welted seams, Kevlar stitched with a heavy duty FR drill cotton liner which features a Thermolate treatment to the palm. The aluminium reflects all thermal radiation away from the user. CE approved to EN12477 & EN388 Cat 2.

Heavy Duty Aluminium 250°C

0700 005 010

Heavy Duty Aluminium 500°C

An ultra high temperature 500°C welding gauntlet featuring: unique aluminised woven Kevlar back capable of withstanding 1000°C, with a heavy duty 1.3mm ceramic fibre supported leather palm capable of Contact heat up to 500°C. The glove features wing thumb, fully welted seams, full Kevlar stitching with a heavy duty cotton jersey liner which features a shearwater treatment to the palm. The aluminium reflects all thermal radiation away from the user. CE approved to EN12477 & EN388 Cat 2.

Heavy Duty Aluminium 500°C

0700 005 046

Heavy Duty Aluminium 1500°C

A revolutionary new product which incorporates high technology woven ceramic fibre to the back of the Aluminised Kevlar Gauntlet, which offers protection against 1500°C radiant heat. This is incorporated into a high grade 1.3mm side split leather palm with full Thermolate felt offering 120°C contact heat protection to the palm. The glove is fully lined with jersey palm, offers a wing thumb, fully welted stitching and full Kevlar stitching. CE approved to EN12477 & EN388 Cat 2.

Safety Footwear

Premium Welding Safety Footwear

ESAB safety shoes and boots are specially developed for the welder. Made of leather to give the best durability against welding spatter and heat. The tongue is designed to prevent welding sparks entering the shoe. If this should still happen, the shoes can be quickly removed because there are no laces. All ESAB Safety shoes for welding are approved according to EN 345 to the highest protection class S3.

Key to safety classes and symbols:

- SB** Safety class Basic according to EN 345 (Lowest protection class, not recommended by ESAB)
- S1** Safety class 1 (Antistatic properties and energy absorbent heel) according to EN 345
- S2** Safety class 2 (Antistatic properties, energy absorbent heel and water repellent upper)
- S3** Safety class 3 (Antistatic properties, energy absorbent heel, water repellent upper, toecap and sole puncture protection) according to EN 345

-  Antistatic properties
- DD** The double density means that the inner sole is made of an advanced impact absorbent material with reinforced arch. The outer sole is made of a non-slip material.
-  Toe cap and sole puncture protection

Safety Footwear

Premium Welding Safety Footwear

ESAB Safety Ankle Boot

Offers protection according to S3, and it prevents weld spatter from falling into the shoe. The special microfibre soft lining makes it very comfortable to wear. The boot is water and oil resistant and the seam is reinforced with rivets for maximum durability. The front is folded and fastened with velcro to give a flat and protected upper. The dual density sole offers a soft upper part with front and back ‘bumpers’ and arch support, whilst the part in direct contact with the ground offers extremely high slip resistance. The shoe is equipped with shock absorption and the TF system to prevent ankle spraining risks, also the sole is heat resistant up to 170°C. They have an elasticated gusset for wide fitting feet with Nomex® treads and high slip resistant soles.

Fume Extraction Units

TM-200 PM-300 TM-80

CarryVac 2 Portable Smoke Extractor

The CarryVac 2 P150/P150 AST are two small, lightweight, portable extraction units designed to be carried to the working area. Connected to a welding torch or to an extraction nozzle, the CarryVac 2 units extract the fume directly at source. The polluted air is filtered and captured in a hygienically-packed filter. The CarryVac 2 is equipped with a filter indicator, which shows when the filter must be replaced. It is ideal for maintenance welding, low and medium-duty cycle. The filter capacity is approximately 200kg of solid wire or twelve 15kg spools. The CarryVac 2 P150 AST is equipped with an automatic start/stop function, which increases the service life of each filter and of the unit itself. Please also see ESAB Centrovac extraction torch range.

Delivery contents:
Supplied complete with 2.5m suction hose (Filter Included).
